

FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: 66 Resources Corp. (the "Issuer").

Trading Symbol: SXX

Number of Outstanding Listed Securities: 8,032,398

Date: May 1, 2019

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer was inactive in April 2019. On April 1, 2019 the Issuer issued news release announcing the results of the fall 2018 exploration program on the Champ Property. A copy of the news release is attached to this form.

2. Provide a general overview and discussion of the activities of management.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.
none
4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.
none
5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.
none
6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.
none
7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.
none
8. Describe the acquisition of new customers or loss of customers.
none
9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.
none
10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.
none
11. Report on any labour disputes and resolutions of those disputes if applicable.
none

- 12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.
none
- 13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.
none
- 14. Provide details of any securities issued and options or warrants granted.

Security	Number Issued	Details of Issuance	Use of Proceeds ⁽¹⁾

(1) State aggregate proceeds and intended allocation of proceeds.

- 15. Provide details of any loans to or by Related Persons. None
- 16. Provide details of any changes in directors, officers or committee members. None
- 17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer’s market(s) or political/regulatory trends. None

Certificate Of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there were is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated: May 1, 2019.

Vancouver, B.C. V6C 2C2

New Release

66 RESOURCES CORP. COMPLETES FOLLOW-UP WORK ON THE CHAMP PROPERTY GOLD PROJECT

April 1, 2018 – 66 Resources Corp. (CSE:XXX) 66 Resources Corp. (the "Company") conducted a second work program on the Champ Property, located 12 kilometers south of Castlegar, BC, during October and November of 2018.

A total of 16,050 meters of GPS located and hip-chained grid was surveyed. The North Grid was extended to the east, two lines were added to the south grid – one on the northern margin and one on the southern margin, and three 1,000-meter grid lines were surveyed on South Grid 2. The new road-cut showing was trenched, mapped, and sampled as were new areas uncovered by recent logging activity.

In total, 576 soil samples and 35 rock samples were taken on the property during the 2018 program.

Mineralization present on the property consists of quartz-sulphide and/or replacement veins that are considered to be intrusion related. Minerals present include pyrite and/or pyrrhotite, chalcopyrite, sphalerite, galena, arsenopyrite. Emplacement of sulphide mineralization is interpreted to occur in a mesothermal environment of deposition (medium temperature and pressure). The best gold values returned from rock samples correlate with increased copper and silver values.

The mineral zones present on the property are related to major north trending normal faults and northwest and northeast trending, steep to moderately dipping conjugate faults. The faults are characterized by clay minerals and increased sulphides.

Some of these altered faults host veins/veinlets of quartz-carbonate, often containing sphalerite, galena, pyrite, pyrrhotite, chalcopyrite, and arsenopyrite. Quartz-carbonate-sulphide mineralization found on the Champ property is emplaced along faults and fractures, such as the Champion Lake Fault (related to the Republic Graben), which formed during Eocene extensional tectonics. The Republic Graben has numerous base and precious mineral deposits related to the major fault structure.

In the roadcut showing area, sampling in 2017 returned anomalous gold of 0.711 g/t within sericitized pyrrhotite-pyrite mineralization. In 2018 this area was hand-trenched and mapped in section. The samples taken in this area in were primarily chips along the plane of the veneer. Sample 440763 returned 0.653 g/t Au and 24.3 g/t Ag respectively. Further prospecting and sampling is justified to determine the potential continuation of this mineralized structure.

At the Champ showing, a small decline shaft excavation also described as a pit is located on a southeast facing forested slope. A dump fan of waste material, approximately 6m sq is composed of dominantly coarse-grained granodiorite with sporadic quartz-pyrite gossanous waste rock (19% pyrite with trace sphalerite and chalcopyrite), a sample of this material (440772) returned 0.143 g/t Au and 4.4 g/t Ag. The entrance to the decline shaft is 2m by 2m, driven down dip on two veins, with one tracing the decline ramp and one semi-parallel to the ceiling. Veins are subparallel, converging in a southwest direction, with a general northwest striking direction.

A chip across the eastern exposure of these lower veins assayed 0.3 g/t Au and 12.2 g/t Ag and is a promising occurrence which requires further investigation by trenching and shallow surface drilling.

Geochemical results from the north grid identify several elevated gold values which show a correlation with silver. These values range from 31-100 ppb Au. A 100 ppb Au in soil taken at 54700N-55900E coincides with rock chip

sample 440782 that contains 52 ppb Au and 269 ppm Cu, and 97 ppm Zn. Several anomalous samples are located in the northeastern section of the grid and require follow-up geological sampling.

A new grid was surveyed to the south of the Dirty Jack Minfile showing with several soil samples returning highly anomalous gold of up to 195 ppb Au.

Elevated gold in soil samples displays a correlation with silver and coincides with gold-bearing rock chip sample locations. Several soil anomalies are present on the property and should be tested by trenching.

To date, several styles of gold and gold-sulphide mineralization have been discovered on the property which are related to either emplacement of the intermediate Middle Jurassic stocks or to the late Tertiary-age extensional faulting and related dykes.

Quartz veining, with minor sulphides and gold values is associated with many generally north to northwest trending fault structures. These structures cut all units and commonly have Tertiary age dykes associated with them. In contrast with the earlier, more sulphide-rich veins, these quartz veins/fracture zones have features indicating much higher levels of emplacement: brittle structures, locally stockwork style mineralization, open spaces and druse quartz. Gold content is locally high, with values to 3300 ppb Au.

The company is currently reviewing it's options.

FOR FURTHER INFORMATION PLEASE CONTACT: Michael Dake, Chief Executive Officer, at Suite 200 – 551 Howe Street, Vancouver, BC, V6C 2C2 email:mdake@shaw.ca.

Certain statements in this release are forward-looking statements, which reflect assumptions related to certain factors including but not limited to, without limitations, exploration and development risks, expenditure and financing requirements, general economic conditions, changes in financial markets, the ability to properly and efficiently staff the Company's operations, the sufficiency of working capital and funding for continued operations, title matters, First Nations relations, operating hazards, political and economic factors, competitive factors, metal prices, relationships with vendors and strategic partners, governmental regulations and supervision, permitting, seasonality and weather, technological change, industry practices, and one-time events. Additional risks are set out in the Company's prospectus dated May 23, 2018 and filed under the Company's profile on SEDAR at www.sedar.com. Should any one or more risks or uncertainties materialize or change, or should any underlying assumptions prove incorrect, actual results and forward-looking statements may vary materially from those described herein. The Company does not undertake to update forward looking-looking statements or forward looking information, except as required by law.
