16. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

Various laws and regulations govern the payments industry in Canada and globally. Our payments services may be or become subject to regulation by other authorities, and the laws and regulations applicable to the payments industry in any given jurisdiction are always subject to interpretation and change.

We expect that new services and technologies applicable to the industries in which we operate will continue to emerge and evolve. Rapid and significant technological changes continue to confront the industries in which we operate, including developments in proximity payment devices, including contactless payments via NFC technology.

There can be no assurance that any new products or services we develop and offer to our customers will achieve significant commercial acceptance. Our ability to develop new products and services may be inhibited by industry-wide standards, payment card networks, existing and future laws and regulations, resistance to change from our customers, which includes our sellers and their buyers, or third parties' intellectual property rights.

The COVID-19 pandemic has impacted and could further impact the Company's merchants, user network and operations as a result of quarantines, facility closures, and travel and logistics restrictions. The COVID-19 pandemic has disproportionately impacted the restaurant industry and specifically restaurants that rely on revenue generated by in-restaurant dining. With restrictions on dining in, many restaurants have limited their operations solely to takeout and delivery, while others have decided to pause or cease operations or drastically cut costs. Historically, a significant percentage of the Company's operating revenue was generated from transaction fees on in-restaurant dining transactions. As a result of the restrictions on in-restaurant dining, we experienced reduced revenues from in-restaurant dining transactions and we may continue to see a reduction in revenue from in-restaurant dining transactions if these conditions continue into future periods. Based on the Company's results from the third quarter, management decided to shift the Company's focus away from the food and beverage vertical to focus more on eCommerce dropshipping merchants, Perk Hero managed stores and digital gift cards.

We believe that the Company will emerge from these events well positioned for long-term growth, however, the Company cannot reasonably estimate the duration or severity of the economic impact to our users and merchant partners caused by the restrictions on daily life to curb the spread of COVID-19. Even after the COVID-19 pandemic has subsided, the Company may experience adverse impacts to its business as a result of any economic recession or depression that has occurred or may occur in the future; therefore, the Company cannot reasonably estimate the impact at this time on our business, liquidity, capital resources and financial results.

We continue to monitor the evolving situation in these uncertain times and to adapt our business accordingly.
