CSE trading volumes and financings have increased in the past year to historic norms. Most commodity prices have increased during the pandemic. The present price of spot gold is US\$1,785/oz, 30% higher than the recent five-year average while the price of silver at around US\$26/oz is 25% higher than the recent five-year average. The Company believes these trends will continue through 2021, as global demand picks up and government spending continues at record levels, fuelling more demand and increasing inflationary pressure across many global jurisdictions. These trends are very positive for exploration companies.

Since the Company's properties are located in BC, we avoid the need for foreign travel which has been severely curtailed due to COVID-19.

BC is a favourable jurisdiction in which to conduct mining, offering stable resource-positive governments, Canadian tax incentive programs such as flow-through shares and mineral exploration tax credits, support for First Nations engagement and strong worker safety and environmental standards.
