Global equity markets appear to have fully recovered from the declines in March 2020 due to the coronavirus pandemic. Most commodity prices have increased in 2020. On the CSE Exchange, trading volumes and financings have increased relative to 2019. Precious metals prices remain about 10% lower than all-time USD high reached in early August, but still trade at a level higher than in the past 8 years. The Company believes these trends will continue through 2021, providing a foundation for early-stage exploration companies.

In BC, where the Company's properties are located, we eliminate the need for foreign travel which has been severely curtailed globally due to COVID-19. BC also continues to be a generally favourable jurisdiction in which to conduct mining, with the availability of Canadian tax incentive programs such as flow-through share and mineral exploration tax credits.
