The Company released assay results on March 11 and March 16, 2021 in respect of its sampling and drill core from the 2020 programs. These results, along with various other datasets, are enabling the exploration team to confidently plan our work programs expected to be undertaken this summer.

Although the Company began negotiations with its key exploration subcontractors in March and began considering the potential scope of exploration work to be done in 2021, there were no significant expenditures or obligations that arose in March.

The Company received Depository Trust Company (“DTC”) eligibility for electronic clearing and settlement of its shares traded on the OTC. This simplifies trading and is expected to improve trading liquidity in the US.

Global equity markets are currently very liquid and stable, as the world starts looking beyond the pandemic. Most commodity prices have increased in the past year including precious metals, although recent declines from prior highs have tempered the increase; The present price of spot gold is US\$1,745/oz, still about 30% higher than the recent five-year average while the present price of silver at US\$25/oz is 25% higher than the recent five-year average. We expect these price support levels to be maintained and then rise

over the next few years as global consumer and government spending contributes to mounting inflationary pressures.

In BC, where the Company’s properties are located, we eliminate the need for foreign travel which has been severely curtailed globally due to COVID-19. BC also continues to be a generally favourable jurisdiction in which to conduct mining, with the availability of Canadian tax incentive programs such as flow-through share and mineral exploration tax credits.
