The Issuer has been focused primarily on monitoring ambient and “in-plant” grow conditions. The Issuer is expanding its offering to monitor energy use in cannabis grow facilities since such growers are expected to be more concerned with the cost of energy use. As well, the issuer is now preparing to provide analytical reports on grow conditions so that licenced producers can better understand the impact of such conditions on yield and crop risk from pathogens. Growers must be able to reduce their operating costs in order to survive and the issuer is attempting to deal with large variables such as energy, yield and crop risk.
