Westridge is focused on the acquisition, evaluation and exploration of mineral resource properties.

2. Provide a general overview and discussion of the activities of management.

The Issuer continues to focus on its Blackjack Gold property and other potential property acquisitions. Management is working on closing an equity financing to increase available working capital.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

Management engaged Longford Exploration in late October to continue its work program on the Blackjack Property region in Kenora, Ontario. Due to extreme weather conditions Longford was only able to spend a couple days in the field until work was suspended. Longford advised that any future work on property would have to be performed in the spring of 2018.

On October 24, 2017 Longford visited the Combination area and the Goldhill area and on October 25, 2017 visited the Slamdance, Bulldog and Blackjack areas, as well as the Mystery and Dulmage areas.

Longford took 29 rock samples spread throughout the project. Sampling targeted three differing objectives:

1. **High grade samples from ore zones: Several quartz veins were identified within the immediate vicinity of shafts, pits or dumps that contained abundant sulphides, primarily; py, cpy, apy, po and galena.**
2. **Composite/ Channel samples across structures related to previous mining: These samples were primarily composed of sheared shists with abundant carbonate alteration and minimal sulphides. These samples were taken in the vicinity of known ore shoots, and were therefore testing the possibility of wall rock mineralisation.**
3. **Disseminated sulphide mineralisation within mafic volcanics: several locations**

contained disseminated sulphides outside the immediate zone of shearing/ quartz veining. These samples were taken to test for a broader disseminated mineralising envelope.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.
