17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

There is a growing awareness and acceptance amongst the public, healthcare providers, insurers/payors, and regulators towards the use of digital and virtual healthcare in general, with mental healthcare making up an increasing component of that. This trend is expected to continue at double digit growth rates globally for the next several years. Its acceptance was expedited by the CV-19 pandemic as patients were discouraged from face-to-face medical intervention in all but the most dire of circumstances. The general public has grown to understand the ease and convenience of digital healthcare as a result and healthcare payors understand that the deployment of digital health solutions both improves outcomes and reduces costs. Governments across Europe are implementing laws requiring payors to cover the cost of digital mental health therapy to the same extent as conventional methods.

Additionally, with the recent advancements in artificial intelligence and the general public's awareness of same, investors and strategic partners are showing a keen and growing interest in sourcing investments in the AI space. Predictions show that AI will have a multi trillion-dollar impact on the global economies and effect almost all facets of modern society. As this is the core business of the Issuer, we expect to benefit positively and significantly, both in terms of investor awareness as well as business development opportunities from this generational event.
