16. Provide details of any changes in directors, officers or committee members.

**Not applicable.**

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

- **Operating trends – The Issuer has no history of earnings, has limited cash reserves, a limited business history, has not paid dividends, and is unlikely to pay dividends in the immediate or near future. The Issuer is in the “start-up” phase of its business. As the Issuer is in the exploration stage, the recoverability of costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties. The Company will periodically have to raise funds to continue operations, and although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.**
- **Commodity trends – The price of gold is in a strong market rally and traded at new all-time record highs during the month of August 2020. The current favourability of the gold sector factors positively in the Issuer's efforts to raise equity financing and execute its planned exploration programs.**
- **Economic trends – The CSE Composite Index closed August 31, 2020 at 490.48 which is a recovery from its five year low of 218.31 on March 18, 2020 during the early days of the COVID-19 pandemic, but still below the comparative year indicator of 534.38 on August 30, 2019 and five year high of 1,436.34 reached on January 31, 2018. Nevertheless, the index is trending upwards since March 2020 and reflects renewed interest in the Canadian small cap market.**
- **Competition trends – The success and recent discoveries of certain other gold exploration companies in Australia have generated attention and interest to the Lachlan Fold Belt where the Issuer's Northern NSW project is strategically situated.**

- **Pandemic trends – On March 11, 2020, the World Health Organization declared the outbreak and spread of a novel coronavirus, COVID-19, a global pandemic. In response to the outbreak, governmental authorities in Canada and internationally have introduced various recommendations and measures to try to limit the pandemic, including implementing travel restrictions, border closures, non-essential business closures, quarantines, self-isolation and physical distancing.**

**The outbreak of COVID-19 may cause disruptions to the Issuer's business and operational plans, which may include: (i) restriction of travel by management to and from Australia; (ii) unavailability of contractors and subcontractors; (iii) interruption of supplies from third parties upon which the Issuer relies; (iv) restrictions imposed by governments to address the COVID-19 pandemic; and (v) restrictions that the Issuer and its contractors and subcontractors impose to ensure the safety of employees and others. It is not currently possible to predict the extent or duration of these potential disruptions, which may have a material adverse effect on the Issuer's business, financial condition and results of operations. These disruptions may severely impact the Issuer's ability to carry out its business plans for 2020.**

**The Issuer has implemented precautionary measures at its corporate office, including limiting visits to essential personnel and ensuring proper protocols are followed with respect to health, hygiene and physical distancing.**

**On March 20, 2020, the Government of Australia banned entry into the country to non-Australian residents and citizens. Government officials have said the COVID-19 outbreak and related disruptions in Australia could last at least six months. Officials say the travel ban will remain in effect until it is safe to lift but have not given a specific date for its termination. As a consequence of this border closure, management in Canada is unable to visit the Issuer's properties in Australia. However, the Issuer's Vice President of Exploration and other technical personnel are residents of Australia and will be able to manage the planned exploration program on the Property unimpeded by the international travel ban.**

**There are currently physical distancing guidelines in place within Australia that restrict gathering and movement. However, the situation is evolving, and the New South Wales Government has announced an easing of restrictions effective May 15, 2020 that will allow more businesses to open up, more people to work and more personal freedoms. The Issuer's exploration activities planned for 2020 are expected to continue in an orderly fashion while ensuring the safety of employees. The Issuer will implement health, hygiene and physical distancing measures that meet any requirements of the Government of Australia. The Issuer will ensure ongoing compliance**

**with the Government of Australia's announcements and any subsequent orders.**
