2. Provide a general overview and discussion of the activities of management.

On March 10, 2020, the Company reported ongoing market research feedback on the i/Blue™ Imaging System which enables simultaneous viewing of white and blue light images during bladder cancer resection.

Since the American Urological Association (“AUA”) Meeting in May 2019 where leading urologists observed simulated cystoscopy demonstrations, Imagin has continued to collect additional input on its i/Blue Imaging System from physicians in the United States and Canada.

The feedback has focused on the i/Blue’s ability to display side-by-side white and blue light images simultaneously, which would enable real-time cancer visualization during resection. Surgeons would no longer need to switch back and forth between the white and blue light images to perform the surgery as the current method requires. This advanced viewing option has the potential to improve surgical technique.
