Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer continued to assess potential exploration programs and other project development initiatives for its various mineral properties in Ontario,

its intellectual property rights and other business initiatives.

These include examining available alternatives for a distribution of Chrome Delivery Warrants amongst desirable and appropriate potential market participants in order to satisfy that requirement for listing the warrants for trading on CNSX. In those researches considerable time has been invested in considering the utility and mechanics of pledging the company's mineral properties under the *Canada Bank Act* so that the pledgee Schedule 1 bank may be the issuer of the delivery warrants thus qualifying them for margin advances to their holders, of up to 50% of their market value. Communications commenced to examine the efficacy of a Swiss private bank providing a guarantee to the pledgee Schedule 1 bank, in exchange for the mineral property exposure.

These initiatives have also included ongoing communications towards identifying the appropriate assets and avenues for the development and financing of railroad transportation over the company's mineral claims staked and assessed to provide access to markets for the chromite discoveries.

These initiatives have also included ongoing communications towards participation of all affected First Nations and the Province of Ontario in a multi-year holistic exploration and development program budget which would provide remote-community funding of infrastructure necessities as a capital cost of the development of the chromite discoveries. These communications included solicitation of support from the ten companies with mineral interests in the area, for the proposed budget and for an application to Ontario to undertake the granting of life-of-mine mineral tenure coincident with the delivery of reclamation sureties upon commencement of production.

More recently, these initiatives have included considering geographical extension of the remote community funding concept as part of an acquisition opportunity being examined.

2. Provide a general overview and discussion of the activities of management.
