

FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: FenixOro Gold Corp. (formerly American Battery Metals Corp.)
(the "Issuer").

Trading Symbol: FENX

Number of Outstanding Listed Securities: 80,352,443

Date: June 8, 2021 (for the month of March 2021)

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

None

2. Provide a general overview and discussion of the activities of management.

On March 15th, 2021, the Issuer announced final drill results from holes P007 – P009 from its recently completed 4029 meter Phase 1 diamond drilling program. These results have some important positive implications for the Company’s understanding of the vein system at its Abriaqui project in Colombia. Highlights include:

- Hole P008 intersected 3.65 meters @ 5.40 g/t gold including 0.25m @ 71 g/t in veins that correlate with mined-out voids in P005 and P006.*
- The mined out voids, 4 zones totaling 13.2 meters in Hole P005 and one zone of 1.6 meters in Hole P006, show potential to positively impact the results from these holes in a significant way (Press Release February 24, 2020). The combination of this newly discovered historical mining area with the results already received (7.7 meters @ 8.46 g/t gold incl 0.45 meters at 124.5 g/t in hole P006) confirm this as an exciting new area deserving further exploration.*
- P009 was drilled across the northwest trending vein corridor (NWC) 500 meters to the southeast of P001. Veins intersected in P009 are many of the same intersected in P001 and extend the strike length of the NWC to a minimum of 1400 meters.*

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

On March 19th, 2021, the Issuer announced its preliminary analysis of the results from its 4029 meter Phase 1 drilling program at Abriaqui and the plan for Phase 2 drilling. Highlights include:

- Analysis of the Phase 1 drilling based on longitudinal sections indicates potential for 1.6 to 2.4 million ounces of contained gold on just four of the 100+ veins identified to date on the property. No NI 43-101 compliant resources or reserves exist on the property to date.*
- Significant additional potential is indicated as this target does not include 80% of the drill intercepts reported in earlier press releases and only about half of the known veins on the property have been drill tested. Several significant intercepts including 7.7 meters @ 8.6 g/t gold in hole P006, are not included in this model exercise.*
- Excellent potential exists for additional resources on all veins below the 1500 meter elevation which was chosen as a base for the resource potential estimate based on the deepest intersection to date.*
- A minimum 4000 meter Phase 2 drilling program will begin in Q2 2021. It will consist of infill and step-out drilling on the 1400 x 350 meter northwest trending corridor of at least nine vein structures (NWC).*

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.
