Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

Metalco Manufacturing Incorporated (“MMI”) is an indirect and major shareholder in the following two companies:

- **Pure Fonte Ltée (“PFL”) – a corporation formed to build a US\$408 million pig iron plant in Quebec**
- **North Atlantic Iron Corporation (“NAIC”) – a corporation owning mineral rights in Labrador, NL.**

Current measures have focused on the two assets to advance them to the next level:

1. **Recent discussions with the permitting stages required for the pig iron plant have commenced. Negotiations remain active with potential capital funding partners.**
2. **On the mineral sands – two advanced mineral processing reports are being assessed. The report utilizing a European firm using crushing, flotation, magnetics with a base grain size of +1.0mm-0.5mm achieves a superior purity of 99.4% SiO₂ with an Fe of 0.07%. The Asian experts focused on spirals (gravity), floatation, magnetics achieving an SiO₂ of 99.3% with an Fe of 0.01%. The lower Fe meets the specifications for clear glass making (residential and commercial) and borosilicate glass (Pyrex). A higher iron (0.07%) can be used for coloured glass – while both the feldspars and silica quartz can be used for construction, sand cast moulds, fibreglass, water filtration, ceramics, and silicon carbide. Currently, the immediate focus is on off-take - a US\$3-5 million financing and permitting program. Several drill permits have been filed with the regulatory authorities.**

A request for meetings with Nalcor to resolve areas of a difference on 2 of the 3 mineral claims of the project have not materialized. The Company has invested considerable capital on certain claims that now have significant portions sterilized by activities related to the hydro dam requirements.

MMI has a holding of 43.92% in GRI which owns 100% of PFL and 90% of NAIC. The trading symbol is ‘MMI’ and trades on the Canadian Securities Exchange (CSE).

2. **Provide a general overview and discussion of the activities of management.**

***The Issuer* continues to monitor the progress of GRI. NAIC has recently commenced re-assessing potential minerals of value with the project in Labrador. Work plans for 2020-21 are being assessed. A dedicated team will advance the next steps including community consultations and permitting.**

There have been significant shifts in several cost centres for the pig iron plant and the net effect is a marginal shift in project economics with CapEx

declining – the movement of inputs and sales process will continue to fluctuate.

Progress on the permitting has been slow due to the restrictions of COVID-19 in our proposed site area.

MMI currently has 19,115,944 shares issued and outstanding.

GRI currently has 23,769,327 shares issued and outstanding.
