Report on Business

During the month, the Issuer completed the following milestones, through Opco (defined below), whom the Issuer has the exclusive option to acquire:

In October 2017: Opco purchased production facility of 40,000 sq. feet with an additional 5 acres of land in village of Mladenovo, a centre of Cannabis Sativa growing, situated approximately 180 Km from the head office in Belgrade-Dobanovci. During this period, Opco started the adaptation of its facility in order to address technical matters relating to the production process. To date, electrical installation and numerous building improvements including water installation have been completed. Security cameras and video surveillance have been installed according to the standards requested by the government for facilities with processing controlled substances. Opco has also established designated storage and control areas for raw material and seed.

In November 2017: Opco completed its harvest of 130 hectares, resulting in 42 metric tons of organic hemp flowers, trim and seed transported to its storage facility (the "**Facility**"), located in the village of Mladenovo, Serbia. In addition, 240 bales of hemp straw were harvested and stored within the Facility. A Euro Prima herb processing and selection machine has also been delivered to the Facility, and installation has begun. The herb processing and selection machine will be used to refine and package the hemp, resulting in 25kg bags of refined hemp. Once the herb processing and selection machine is ready for use and training has been completed, which is expected to be early next week, the processing of the stored flowers and trim can begin.

Furthermore, a new tractor and plow have been delivered to the Facility in anticipation of plowing and seeding for next year's harvest. The intention is to plan and budget to harvest 500 hectares next year versus the 130 hectares that were harvested this year, which would result in an increase of planted area of 285%.

The Vitalis Extractor, as previously press released October 18th, 2017 has arrived on site in Belgrade and preparations to setup the extractor machine has begun.
