**Report on Business**

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

**During the month ended March 31, 2026, the Issuer:**

i) announced its participation in the 38th Annual ROTH Conference taking place in Dana Point, California from March 22-24, 2026. The Conference provides a focused opportunity for the Issuer to meet with institutional investors and discuss the Issuer's execution plans, scale-up roadmap, and Commercialization Program.

ii) announced that it has signed a non-binding Letter of Intent ("LOI") with a leading independent international commodities trading company active in the sourcing, logistics, and marketing of naphtha and certified circular hydrocarbon streams. The LOI establishes a framework to evaluate and qualify Hydrochemolytic™ oil produced by the Issuer for future offtake agreements. It also includes a committed offtake arrangement for the initial production parcel tied to the Issuer's First-of-a-Kind ("FOAK") Industrial Plant planned for construction at Chemelot Industrial Park in Geleen, Netherlands. It establishes a structured Pilot-to-FOAK validation program intended to determine product value, confirm specification alignment, and evaluate reproducibility of Hydrochemolytic™ oil while supporting downstream market positioning as part of the circular hydrocarbon markets. Under Phase 1 of the engagement, the Issuer will provide samples of Hydrochemolytic™ oil produced at its Next Generation Process ("NGP") Pilot Plant. Phase 2 establishes a commercial validation step upon commissioning of the FOAK Industrial Plant.

iii) announced that its wholly owned subsidiary, Aduro Energy Inc., has signed a non-binding Memorandum of Understanding ("MOU") with a leading Global Engineering, Procurement, and Construction ("GEPC") company to jointly develop a comprehensive commercial licensing package for Hydrochemolytic™ Technology ("HCT") to support deployment across multiple markets. The MOU establishes a framework and stage-gated activities to support the development of the technology and of a commercial licensing model for HCT.

iv) announced that it has entered into an agreement (the "Agreement") with Water Tower Research LLC ("WTR"), an institutional research and investor engagement firm to provide comprehensive research coverage and strategic investor engagement services to support the Issuer's growth objectives and enhance visibility within the institutional investment community. Under the terms of the Agreement, WTR will provide research and capital markets communications services to the Issuer for an initial term of six months beginning April 1, 2026. The services provided to the Issuer include the production of content, including research reports distributed through WTR's proprietary digital delivery infrastructure and digital and marketing channels. In consideration for the services to be provided by WTR, the Issuer has agreed to pay an aggregate cash fee of US\$39,000 (plus any applicable taxes), payable upon the execution of the Agreement. The Issuer may renew the Agreement for a subsequent six-month period (the "Renewal Term") at any time after August 31, 2026, by providing a written notice of intent to renew (the "Notice") to WTR, which Renewal Term will be effective as of September 30, 2026. If the Issuer provides the Notice to WTR, the Issuer will pay to WTR an aggregate cash fee of US\$48,000 (plus applicable taxes) in consideration for the services provided during the Renewal Term.

v) announced that it has joined Chemical Recycling Europe (“CRE”), a European industry association focused on advancing chemical recycling through policy engagement, standard setting, and value chain collaboration. Chemical Recycling Europe brings together stakeholders across the plastics and chemicals ecosystem to support the development of regulatory frameworks, certification systems, and market structures required to scale chemical recycling technologies. The Issuer’s membership comes as it advances development of its FOAK industrial plant in Europe. Joining CRE provides the Issuer with a platform to engage directly in the frameworks that will define how chemical recycling is implemented at industrial scale in Europe.

vi) announced that Ofer Vicus, Chief Executive Officer, will present at three investor conferences in April. These investor engagements support the Issuer’s commercial momentum as it advances from pilot-scale operations toward industrial deployment. Mr. Vicus will present at the Lytham Partners 2026 Industrials & Basic Materials Investor Summit, a virtual event held on April 1, 2026; the Gabelli Funds 12th Annual Waste & Sustainability Symposium, held on April 9, 2026, at New York; and the WTR Insights Conference, a virtual event taking place on April 14-15, 2026.
