- (b) The term “Issuer” includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. ***Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.***

This Issuer is the first publicly-traded company of its kind in North America, pioneering the investment, development, and commercialization of cellular agriculture technologies and products. Through its global portfolio of companies and its venture studio, the Issuer provides investors with unprecedented exposure to the most innovative start-up, private or early-stage cultivated meat, cell-based dairy, and other cultured food companies around the world.

2. *Provide a general overview and discussion of the activities of management.*

During the month of November, 2023, the Issuer's principal activities consisted of announcing the details and commercialization plans for its third proprietary ingredient, a blend of yeasts called Bmeaty™ (See Item 3 below); appointing a new CEO to the Company (see Item 15 below); and general corporate and administrative matters.

3. *Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.*

On November 30, 2023 the Issuer announced details and commercialization plans for its third proprietary ingredient, a blend of yeasts called Bmeaty™.

Palatability is a major concern for meat-free pet brands as well as companies developing cell-cultivated meats for cats and dogs. Bmeaty™ gives meat-free treats and foods the meaty, umami flavor that cats and dogs love. It is approximately 40% protein and also a source of B vitamins and dietary fiber – all beneficial to a cat or dogs' everyday diet.

Bmeaty™ is made through a process of primary fermentation and fractionation. After yeast is made in fermentation vats, scientists fractionate the yeast cell wall using a hydrolysis process. The extract, hydrolyzed yeast and a carrier yeast make up the new ingredient.

Bmeaty™ joins a suite of proprietary and patented ingredients developed by CULT. Bmmune® is a nutritional yeast mixed with fermented proteins that offer pets a spectrum of health benefits, including improved digestion, immune system support, and overall cognitive and heart health. Bflora® is a powerful probiotic designed specifically for cats and dogs' gastrointestinal tracts, with four strands of bacterial probiotic mixed with a healthy yeast. The ingredients are currently being sold to pet food brands and will be an ingredient in several plant-based products released in 2024. The Company is also in advanced partnership discussions with pet food brands in North America and Europe.

The ingredients are also included in Noochies!, the world's first freeze-dried, high-protein and nutrient-rich pet food made without factory farming. Noochies! products are available in select retail stores in California and Oregon and online at <https://www.noochies.co> (US only). Residents outside the continental U.S. and stores interested in carrying Noochies! products can reach out to the company at hello@noochies.co.
