FOR IMMEDIATE RELEASE

BioCure Announces the Appointment of a New Director

Vancouver, British Columbia – September 4th, 2018 – Biocure Technology Inc. (formerly Gravis Energy Corp.) (CSE: CURE) (the “**Company**” or “**Biocure**”) is pleased to announce that effective of today’s date, Mr. Hans Frykman has been appointed as a director of Biocure Technology Inc.

Ms. Marco Nonni is resigning from the Board effective immediately. The Board would like to thank Mr. Nonni for her tenure with the Company and her efforts with ushering it through the change of business. He will continue working with the Company on a consulting basis.

Dr. Hans Frykman is the current medical director of Neurocode Labs in Vancouver and UBC Diagnostic Services Lab. Neurocode is world leading in the field of neurogenetics accepting difficult adult and paediatric neurology cases from Asia, North America and Europe. It is Canada's first and only clinical whole exome sequencing laboratory. Also, Neurocode has a best in class software product linking genotype to phenotype in the area of neurogenetics. UBC Diagnostic Services Lab is Canada's leading clinical Neuroimmunology laboratory servicing all provinces with this highly complex testing. Under Dr. Frykman's guidance, the UBC Diagnostic Services lab has expanded fourfold. Dr. Frykman has a medical degree from Karolinska Institute in Stockholm, a PhD in Biocatalysis at Royal Institute of Technology, and post graduate medical training from Karolinska University Hospital Solna Campus, Mayo Clinic, University of Minnesota, Memorial Sloan Kettering and University of British Columbia in the areas of internal medicine, oncology, clinical pathology, molecular genetics and medical biochemistry. Dr. Frykman held research positions with the US Government, Astra Zeneca, Akzo Nobel and Novo Nordisk. Early in his career he was part of the discovery teams around Victoza and Losec (Prilosec). He is licensed to practice medicine in Sweden and British Columbia.

The Company has granted to Mr. Frykman aggregate of 250,000 options for a two year term at an exercise price of \$0.75 per share.

About Biocure

Biocure is a South Korean based Bio Pharmaceutical company specializing in the development and potential commercialization of biosimilar pharmaceutical products. Biocure is in the process of pre-clinical trials of five major biosimilar products in South Korea, including Interferon Beta 1b, PEG-Filgrastim and Ranibizumab as well as CAR-T Cell Therapy. Interferon Beta 1b is used for treating relapsing forms of multiple sclerosis (“MS”) Filgrastim is used to treat neutropenia, a lack of certain white blood cells caused by bone marrow transplants, chemotherapy, and other conditions. Ranibizumab is used for treating macular degeneration. It is also used to treat a type of eye problem known as macular

edema, as well as certain eye problems caused by diabetes. Biocure is also developing a foot and mouth disease vaccine, a hair growth production product and a breast cancer detection kit.

ON BEHALF OF THE BOARD OF DIRECTORS

/s/ "Sang Mok Lee"
CEO and Director
