

## News Release

February 16th, 2021

### FOR IMMEDIATE RELEASE

#### **BiocurePharm, Korea ("BPK") Announces the Appointment of a New Independent Director, Mr. Berkan Unal**

VANCOUVER, British Columbia, February 16<sup>th</sup>, 2021-- Biocure Technology Corp. ("CURE" or the "Company") (CSE:CURE; OTCQB: BICTF) is pleased to announce that Mr. Berkan Unal has joined the Board of Directors as an Independent Director, effective immediately. He will replace Mr. Hans Frykman, whom was a valuable asset to our Board for 3 years. We wish him continued success and thank him for his service.

Mr. Unal brings an impressive and diverse resume, including over 10 years of experience in the biopharmaceutical industry and solid connections to global leaders in the bio-pharmaceutical sector. He studied bioprocess engineering and medical biotechnology at the Berlin Technical University of Applied Sciences, Hamburg University of Technology and the Imperial College London.

Currently, he is acting and will continue, as the Business Development Director for Biologics, Gene and Cell Therapy of GenScript Biotech. Both are global leading biotech companies and Mr. Unal has been involved in the processes which provides end-to-end solutions from discovery to commercialization. His experience is a welcomed addition to our team. Prior to joining GenScript Biotech, he worked for biotech companies in Switzerland and Germany.

Dr. Sang Mok Lee, CEO and President of Biocure and BPK, states "We would like to thank Mr. Frykman for his invaluable contribution to the Board throughout his tenure and wish him continued success in his endeavors. As we move the Company forward from discovery to commercialization, we welcome Mr. Berkan Unal's broad experience to assist the Company's Management in realizing our business model which could enable European ALL patients with an affordable CAR T Therapy to save more lives."

The company also has granted 6,020,000 options at 0.30 for three years vesting immediately.

### **About Biocure**

Biocure is a South Korean based Bio Pharmaceutical company specializing in the development and potential commercialization of biosimilar pharmaceutical products. Biocure is in the process of pre-clinical trials of five major biosimilar products in South Korea, including Interferon Beta 1b, PEG-Filgrastim and Ranibizumab as well as CAR-T Cell Therapy. Interferon Beta 1b is used for treating relapsing forms of multiple sclerosis ("MS") Filgrastim is used to treat neutropenia, a lack of certain white blood cells caused by bone marrow transplants, chemotherapy, and other conditions. Ranibizumab is used for treating macular degeneration. It is also used to treat a type of eye problem

known as macular edema, as well as certain eye problems caused by diabetes. Biocure is also developing a foot and mouth disease vaccine, and a hair growth production product.

ON BEHALF OF THE BOARD OF DIRECTORS

/S/ "SANG MOK LEE"  
CEO and Director
