

## **Ketamine Wellness Centers (KWC) Introduces NAD+ Infusion Therapy**

*KWC Becomes Largest Ketamine Provider in the U.S. to Offer NAD+, Will be Available to Patients at Six Clinic Locations Beginning May 9*

**GILBERT, AZ**, May 4, 2022 - Ketamine Wellness Centers (KWC), the largest ketamine therapy provider in the U.S. and a subsidiary of Delic Holdings Corp ("Delic" or the "Company") (**CSE: DELC**) (**OTCQB: DELCF**) (**FRA: 6X0**), today announced the introduction of NAD+ infusion therapy at six of its clinic locations—Jacksonville, Houston, Salt Lake City, Dallas, Las Vegas and Tucson—beginning May 9 with plans to expand nationwide. This therapy is administered intravenously or intramuscularly (IM) and has the potential to boost natural energy stores and immunity, brain and DNA function, and cell communication when a patient is successfully treated, along with enhancing the process of healing chronic conditions such as depression, PTSD and anxiety.

Nicotinamide adenine dinucleotide (NAD+) is a critical molecule that not only helps convert food to energy, but also plays a crucial role in maintaining proper cell health. As a person ages, a decline in NAD+ levels may negatively impact the individual's health and susceptibility to age-related diseases. There is also evidence that NAD+ therapy supports the creation of new cells, neuropathways, and networks in the brains of adults which can support a patient's recovery from various mental health conditions.

KWC's NAD+ treatments are only offered under rigorous clinical supervision in controlled settings. All programs undergo frequent quality assurance evaluations and comply with the highest standards of care and all recommended guidelines. KWC is dedicated to providing affordable and personalized mental health treatments throughout its vast network of ketamine clinics, allowing it to serve thousands of patients in nine states.

"At KWC we are committed to building on our holistic approach to mental health wellness and pursuing the most effective and suitable treatments to address our patients' needs," said Kevin

Nicholson, CEO of KWC and Chief Operating Officer for Delic. “The introduction of NAD+ infusion therapy to our clinics is a strong complement to ketamine therapy and has benefits for their mental and physical well-being. Moving forward, we are excited to explore new methods of treatments that may support our patients even further on their journey.”
