1. NATURE AND CONTINUANCE OF OPERATIONS

Evolution Global Frontier Ventures Corp. (the “Company”) was incorporated on October 13, 2016 under the Business Corporations Act, (British Columbia). The Company is engaged in the acquisition, exploration and development of mineral resource properties located in Canada.

The Company’s head office and records office is located at 2922 Mount Seymour Parkway, North Vancouver, BC, V7H 1E9. Effective December 11, 2020, the Company shares traded on the Canadian Securities Exchange.

The recovery of the amounts comprising mineral properties is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development, and upon future profitable production.

These condensed interim consolidated financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. At June 30, 2023, the Company had not yet achieved profitable operations, had accumulated losses of \$550,880 (June 30, 2022 - \$489,427) since its inception, and expects to incur further losses in the development of its business, all of which casts significant doubt about the Company’s ability to continue as a going concern. A number of alternatives including, but not limited to selling an interest in one or more of its properties or completing a financing, are being evaluated with the objective of funding ongoing activities and obtaining working capital. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due.

The condensed interim consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

Since March 2020, several measures have been implemented in Canada and the rest of the world in response to the increased impact from novel coronavirus (COVID-19), which include the implementation of travel bans, self-imposed quarantine periods and social distancing. COVID-19 has caused material disruption to businesses globally resulting in an economic slowdown. These measures could adversely affect and harm the Company by limiting access to our exploration and evaluation assets, which could prevent the Company from meeting its exploration expenditure obligations. The measures and disruption to business globally could potentially impact the ability to procure new exploration and evaluation mineral properties. The Company continues to operate its business at this time. While the impact of COVID-19 is expected to be temporary, the current circumstances are dynamic and the impacts of COVID-19 on business operations cannot be reasonably estimated at this time. The Company anticipates this could have an adverse impact on its business, results of operations, financial position and cash flows in future periods.

2. BASIS OF PREPARATION

Statement of Compliance

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Accounts Standards (“IAS”) 34, “Interim Financial Reporting” using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”).

(Unaudited - Expressed in Canadian Dollars)
FOR THE PERIOD ENDED JUNE 30, 2023 AND 2022

2. BASIS OF PREPARATION (CONT'D)

Basis of Presentation

The condensed interim consolidated financial statements have been prepared using accounting policies consistent with those used in the Company's 2022 audited financial statements. These condensed interim consolidated financial statements should be read in conjunction with the audited financial statements of the Company as at and for the year ended September 30, 2022.

The condensed interim consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments classified at fair value through profit or loss which are stated at their fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting. The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 3.

Accounting Standards Issued But Not Yet Effective

A number of new standards, and amendments to standards and interpretations, are not yet effective and have not been early adopted in preparing these condensed interim consolidated financial statements. These new standards, and amendments to standards and interpretations are either not applicable or are not expected to have a significant impact on the Company's consolidated financial statements.

Basis of Consolidation

A subsidiary is an entity the Company controls when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Intercompany balances and transactions, including unrealized income and expenses arising from intercompany transactions, are eliminated in preparing the condensed interim consolidated financial statements.

These condensed interim consolidated financial statements include the accounts of the Company and its past principal subsidiaries:

3. SIGNIFICANT ESTIMATES, ASSUMPTIONS AND JUDGMENTS

The preparation of the condensed interim consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The condensed interim consolidated financial statements include estimates which, by their nature, are uncertain. The impact of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Information about critical judgments in applying accounting policies and sources of estimation uncertainty that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the condensed interim consolidated financial statements within the next financial year are the same as those that applied to the Company's 2022 annual financial statements and to the period ended March 31, 2023 financial statements.

11. SEGMENTED INFORMATION

The Company operates in one reportable operating segment, being the acquisition and exploration of mineral properties in Canada. As the operations comprise a single reporting segment, amounts disclosed also represent segment amounts.

12. FINANCIAL AND CAPITAL RISK MANAGEMENT

The three levels of the fair value hierarchy are:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – inputs that are not based on observable market data.

The Company enters into financial instruments to finance its operations in the normal course of business. The fair values of cash, receivable, accounts payable and loans payable approximate their carrying values due to the short-term maturity of these instruments.

The fair value of the Company's financial instruments has been classified within the fair value hierarchy as follows:

September 30, 2022	Level 1	Level 2	Level 3	Total
Financial Assets				
Cash	\$ 2,559	-	-	\$ 2,559
	\$ 2,559	-	-	\$ 2,559
March 31, 2023	Level 1	Level 2	Level 3	Total
Financial Assets				
Cash	\$ 1,764	-	-	\$ 1,764
	\$ 1,764	-	-	\$ 1,764

The Company is exposed to varying degrees to a variety of financial instrument related risks:

Foreign exchange risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. Management believes the foreign exchange risk derived from currency conversions is negligible. The foreign exchange risk is therefore manageable and not significant. The Company does not currently use any derivative instruments to reduce its exposure to fluctuations in foreign exchange rates.

Credit risk

The Company's cash is largely held in large Canadian financial institutions. The Company does not have any asset-backed commercial paper. The Company maintains cash deposits with Schedule A financial institution, which from time to time may exceed federally insured limits. The Company has not experienced any significant credit losses and believes it is not exposed to any significant credit risk.

Interest rate risk

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities with variable interest rates expose the Company to

cash flow interest rate risk. The Company does not hold any financial liabilities with variable interest rates. The Company does maintain bank accounts which earn interest at variable rates but it does not believe it is currently subject to any significant interest rate risk.

Liquidity risk

The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances and through short-term borrowing. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments.

Price risk

The ability of the Company to explore its mineral properties and the future profitability of the Company are directly related to the market price of precious metals. The Company monitors precious metals prices to determine the appropriate course of action to be taken by the Company.

Capital management

The Company defines its capital as shareholders' equity. The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration and development of mineral properties. The Board of Directors do not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The properties in which the Company currently has an interest are in the exploration stage. As such, the Company has historically relied on the equity markets to fund its activities. In addition, the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will need to raise additional funds. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
