FORM 5

QUARTERLY LISTING STATEMENT

Name of CSE Issuer: **Crop Infrastructure Corp (formerly Fortify Resources Inc.)** (the "Issuer").

Trading Symbol: **CROP**

This Quarterly Listing Statement must be posted on or before the day on which the Issuer's unaudited interim financial statements are to be filed under the *Securities* Act, or, if no interim statements are required to be filed for the quarter, within 60 days of the end of the Issuer's first, second and third fiscal quarters. This statement is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by the CSE Policies. If material information became known and was reported during the preceding quarter to which this statement relates, management is encouraged to also make reference in this statement to the material information, the news release date and the posting date on the CSE website at www.thecse.com.

General Instructions

(a) Prepare this Quarterly Listing Statement using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the following items must be in narrative form. When the answer to any item is negative or not applicable to the Issuer, state it in a sentence. The title to each item must precede the answer.

(b) The term "Issuer" includes the CSE Issuer and any of its subsidiaries.

(c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

There are three schedules which must be attached to this report as follows:

SCHEDULE A: FINANCIAL STATEMENTS

Financial statements are required as follows:

For the first, second and third financial quarters interim financial statements prepared in accordance with the requirements under Ontario securities law must be attached.

If the Issuer is exempt from filing certain interim financial statements, give the date of the exempting order.

SCHEDULE B: SUPPLEMENTARY INFORMATION

The supplementary information set out below must be provided <u>when not included in Schedule A.</u>

1. Related party transactions

All related party transactions have been disclosed in the Issuer's financial statements for the interim period ended August 31, 2018.

Provide disclosure of all transactions with a Related Person, including those previously disclosed on Form 10. Include in the disclosure the following information about the transactions with Related Persons:

(a) A description of the relationship between the transacting parties. Be as precise as possible in this description of the relationship. Terms such as affiliate, associate or related company without further clarifying details are not sufficient.
(b) A description of the transaction(s), including those for which no amount has been recorded.
(c) The recorded amount of the transactions classified by financial statement category.
(d) The amounts due to or from Related Persons and the terms and conditions relating thereto.
(e) Contractual obligations with Related Persons, separate from other contractual obligations.
(f) Contingencies involving Related Persons, separate from other contingencies.

2. Summary of securities issued and options granted during the period.

All securities issued and options granted by the Issuer have been disclosed in the Issuer's financial statement notes for the interim period ended August 31, 2018.

Provide the following information for the period beginning on the date of the last Listing Statement (Form 2A):

(a) summary of securities issued during the period,

Date of Issue	Type of Security (common shares, convertible debentures, etc.)	Type of Issue (private placement, public offering, exercise of warrants, etc.)	Number	Price	Total Proceeds	Type of Consideration (cash, property, etc.)	Describe relationship of Person with Issuer (indicate if Related Person)	Commission Paid

(b) summary of options granted during the period,

Date	Number	Name of Optionee if Related Person and relationship	Generic description of other Optionees	Exercise Price	Expiry Date	Market Price on date of Grant

3. Summary of securities as at the end of the reporting period.

A summary of securities has been provided in the financial statements for the interim period ended August 31, 2018.

Provide the following information in tabular format as at the end of the reporting period:

(a) description of authorized share capital including number of shares for each class, dividend rates on preferred shares and whether or not cumulative, redemption and conversion provisions,

(b) number and recorded value for shares issued and outstanding,

(c) description of options, warrants and convertible securities outstanding, including number or amount, exercise or conversion price and expiry date, and any recorded value, and

(d) number of shares in each class of shares subject to escrow or pooling agreements or any other restriction on transfer.

4. List the names of the directors and officers, with an indication of the position(s) held, as at the date this report is signed and filed.

Name of Director	Position(s) Held

1. NATURE AND CONTINUANCE OF OPERATIONS

Crop Infrastructure Corp. (formerly Fortify Resources Inc.) ("Crop" or the "Company") was incorporated on August 31, 2011, under the British Columbia Business Corporations Act. The Company changed its name from Fortify Resources Inc. to Crop Infrastructure Corp. on March 5, 2018. The Company's head office is located at Suite 600, 535 Howe Street, Vancouver, V6C 2Z4.

On March 2, 2018, the Company completed a transaction pursuant to a business combination agreement dated November 3, 2017 with DV Infrastructure Corp. ("DVI"). The Company acquired all of the issued and outstanding common shares of DVI. The transaction resulted in a reverse takeover of the Company by the shareholders of the DVI. The Company intends to continue on with the business of DVI, with DVI as the Company's wholly-owned operating subsidiary. The historical operations, assets and liabilities of DVI are included in the August 31, 2018 condensed consolidated interim financial statements, and the comparative figures as at February 28, 2018 and for the six months period ended August 31, 2017 are those of DVI, which is deemed to be the continuing entity for financial reporting purposes.

Concurrent with the closing of the acquisition, the Company changed its name from Fortify Resources Inc. to Crop Infrastructure Corp., and effected a change in directors, management and business. The new listing symbol also changed to "CROP".

DV Infrastructure Corp. (the "Company or DVI") was incorporated on November 27, 2015 under the under the BC Business Corporations Act. The head office, registered and records office of the Company is located at 2331 Rogerson Drive, Coquitlam, BC, V3J 6Y1 Canada.

DVI is engaged in the business of investing, constructing, owning and leasing mega greenhouse projects to licensed cannabis producers through its investments.

These condensed consolidated interim financial statements have been prepared on the going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The Company has incurred losses since its inception and has an accumulated deficit of $10,003,618 as at August 31, 2018. In addition, the Company has no source of revenue and does not generate cash flows from operating activities. The Company is currently subject to risks and uncertainties common to drug discovery companies, including technological change, potential infringement on intellectual property of and by third parties, new product development, regulatory approval and market acceptance of its products, activities of competitors and its limited operating history. These factors give rise to a material uncertainty which casts significant doubt upon the Company's ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

2. REVERSE MERGER AND LISTING EXPENSE

On March 2, 2018, Crop acquired 100% ownership of DVI by acquiring all of the issued and outstanding shares of DVI from the shareholders of DVI. For accounting purposes, the acquisition is considered to be outside the scope of IFRS 3 *Business Combinations* ("IFRS 3") since Crop did not constitute a business. As a result, the acquisition is accounted for in accordance with IFRS 2 *Share-based Payment* whereby DVI is deemed to have issued shares and warrants in exchange for the net assets of Crop together with its listing status at the fair value of the consideration deemed received by Crop's shareholders. The accounting for this transaction resulted in the following:

(i) The condensed consolidated interim financial statements of the combined entities are issued under the legal parent, Crop, but are considered a continuation of the financial statements, assets and operations of the legal subsidiary, DVI.

(ii) Since DVI is deemed to be the continuing entity for accounting purposes, its assets and liabilities are included in the condensed consolidated interim financial statements at their historical carrying values.

(iii) As part of the completion of the acquisition, the former shareholders of Crop retained 3,027,191 common shares of the Company and 1,734,242 warrants exercisable at $0.12.

(iv) Concurrent with the closing of the acquisition of Crop by DVI on March 2, 2018, DVI completed a brokered private placement of 50,395,200 units at $0.10 per unit for gross proceeds of $5,039,520. Each full warrant will entitle the holder to purchase an additional common share at the price of $0.20 per share for a period of 24 months from the closing date of the private placement. Should the Company's share price trade at $0.40 per share or above for 5 consecutive trading days then the Company will have the option to give notice to the warrant holders to accelerate the exercise of the warrants within 10 days or the warrants will expire. In connection with the private placement, DVI has committed to the issuance of 1,293,500 units to certain brokers and finders ("Finders") on the same terms as the private placement upon the closing of the private placement.

The common shares of DVI issued pursuant to the concurrent financing and the Agents' Financing Shares were exchanged for common shares of the Company in connection with the acquisition.

Since the share and share-based consideration allocated to the former shareholders of Crop on closing the acquisition is considered within the scope of IFRS 2, and the Company cannot identify specifically some or all of the goods or service received in return for the allocation of the shares and warrants, the value in excess of the net identifiable assets or obligations of Crop acquired on closing was expensed in the condensed consolidated interim statement of comprehensive loss as listing expense.

2. REVERSE MERGER AND LISTING EXPENSE (continued)

The share-based compensation in the amount of $840,544 included in the listing cost is comprised of the fair value of shares and warrants of the Company retained by the former shareholders of Crop, which consists of $302,719, representing the fair value of the 3,027,191 common shares deemed issued and $537,825 representing the fair value of the warrants. The fair value of the warrants was based on an application of the Black-Scholes option pricing model, using the following assumptions: a share price of $0.36 per share, an average volatility of 152%, an average annual risk-free interest rate of 1.80%, no dividends or forfeiture, and expected remaining useful lives of 2.16.

The fair value of all the consideration given up and charged to listing expense was comprised of:

	$
Deemed issuance of 3,027,191 common shares	302,719
Deemed granted 537,825 Warrants	537,825
	840,544
Identifiable net assets of Crop assumed:	
Cash	5,683
Other assets	7,599
Liabilities	(69,084)
Net liabilities	(55,802)
Listing expense	896,346

3. SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

The condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, “Interim Financial Reporting” (“IAS 34”), as issued by the International Accounting Standards Board (“IASB”) and therefore, do not contain all disclosures required by International Financial Report Standards ("IFRS") for annual financial statements. Accordingly, these condensed consolidated interim financial statements should be read in conjunction with the Company’s most recently prepared audited annual financial statements for the 14 month period ended February 28, 2018.

The policies applied in these condensed consolidated interim financial statements are consistent with the policies disclosed in Note 2 of the audited annual financial statements for the 14 month period ended February 28, 2018.

The condensed consolidated interim financial statements were authorized for issue by the Board of Directors on October 29, 2018. These condensed consolidated interim financial statements are prepared on historical costs basis, except for financial instruments classified as fair value through profit or loss. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting and presented in Canadian dollars.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Basis of Presentation and Consolidation

These condensed consolidated interim financial statements were prepared on a historical cost basis, except for financial instruments classified as fair value through profit or loss. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information. For the period ended August 31, 2018, the consolidated financial statements include the following entities:

Entity	Country	Relationship	Functional currency
Crop Infrastructure Corp.	Canada	Parent	Canadian dollars
DV Infrastructure Corp.	Canada	Subsidiary	Canadian dollars

All significant inter-company balances and transactions have been eliminated on consolidation.

The condensed consolidation interim financial statements for the period of August 31, 2017 include DV Infrastructure Corp. only.

Significant accounting judgments and estimates

The preparation of condensed consolidated interim financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which affect the application of accounting policies and the reported amounts of assets, liabilities and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected. The determination of listing expense, valuation of shares and warrants deemed issued in connection with the reversed acquisition as described in Note 2, and the assumptions and models used for estimating fair value for share-based payment transactions constituted significant areas of estimates.

Critical judgements in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements include the following:

- the determination of whether or not an investment is considered a joint arrangement or an investment in associates
- the determination of deferred income tax assets and liabilities
- the evaluation of the Company’s ability to continue as a going concern

Cash and cash equivalents

Cash and cash equivalents are comprised of cash in banks, and all short-term investments that are highly liquid in nature, cashable, and have an original maturity date of one year or less.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Deferred finance costs

Professional, consulting and regulatory fees as well as other costs directly attributable to financing transactions are reported as deferred financing costs until the transactions are completed, if the completion of the transaction is considered to be probable. Share issuance costs are charged to share capital when the related shares are issued. Costs relating to financing transactions that are not completed, or for which successful completion is considered unlikely, are charged to operations.

Shared-based payments

The fair value of the options is measured at grant date, using the Black-Scholes option pricing model, and is recognized over the period that the employees earn the options. The fair value is recognized as an expense with a corresponding increase in equity. The amount recognized as expense is adjusted to reflect the number of share options expected to vest.

Income taxes

Deferred income tax assets and liabilities are recognized for deferred income tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred income tax assets and liabilities are measured using the enacted or substantively enacted tax rates expected to apply when the asset is realized or the liability settled. The effect on deferred income tax assets and liabilities of a change in tax rates is recognized in income in the period that substantive enactment occurs. To the extent that the Company does not consider it probable that a deferred income tax asset will be recovered, the deferred income tax asset is not recognized. Deferred income tax assets and liabilities are offset only if a legally enforceable right exists to offset current tax assets against liabilities and the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

Provisions

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount can be made. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Earnings (loss) per share

Basic earnings (loss) per share is computed by dividing the net earnings (loss) available to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted earnings (loss) per share is computed similar to basic earnings (loss) per share except that the weighted average share outstanding are increased to include additional shares for the assumed exercise of stock options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting periods.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments

(i) Financial assets - Classification
The Company classifies its financial assets in the following categories:

- Those to be measured subsequently at fair value (either through Other Comprehensive Income ("OCI"), or through profit or loss), and
- Those to be measured at amortized cost.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows. For assets measured at fair value, gains and losses are either recorded in profit or loss or OCI.

(ii) Fair value hierarchy
The following table summarizes the fair value hierarchy under which the Company's financial instruments are valued.

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and
Level 3 - Inputs for the asset or liability that are not based upon observable market data.

Cash is carried at fair value using a level 1 fair value measurement. The carrying value of cash, amounts receivable and accounts payable approximate to their fair value because of the short-term nature of the instruments.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

(iii) Financial assets - Measurement
At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss. Financial assets are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments (continued)

(iii) Financial assets – Measurement (continued)
Subsequent measurement of financial assets depends on their classification. There are three measurement categories under which the Company classifies its debt instruments:

- Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included as finance income using the effective interest rate method.

- Fair value through OCI ("FVOCI"): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains and losses, interest revenue, and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in other gains (losses). Interest income from these financial assets is included as finance income using the effective interest rate method.

- Fair value through profit or loss: Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVTPL. A gain or loss on an investment that is subsequently measured at FVTPL is recognized in profit or loss and presented net as revenue in the Statement of Loss and Comprehensive Loss in the period in which it arises.

The Company has classified its cash, amounts receivable and loans and advances as FVTPL.

(iv) Financial liabilities
The Company classifies its financial liabilities into the following categories:

- Financial liabilities at FVTPL; and
- Amortized cost.

A financial liability is classified as at FVTPL if it is classified as held-for-trading or is designated as such on initial recognition. Directly attributable transaction costs are recognized in profit or loss as incurred. The fair value changes to financial liabilities at FVTPL are presented as follows:

- the amount of change in the fair value that is attributable to changes in the credit risk of the liability is presented in OCI; and
- the remaining amount of the change in the fair value is presented in profit or loss.

The Company does not designate any financial liabilities at FVTPL.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments (continued)

(iv) Financial liabilities (continued)
Other non-derivative financial liabilities are initially measured at fair value less any directly attributable transaction costs. Subsequent to initial recognition, these liabilities are measured at amortized cost using the effective interest method.

The Company has classified its accounts payable as amortized cost.

Impairment

(i) Non-financial assets

The carrying amounts of the Company's non-financial assets, other than deferred income tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the assets' recoverable amount is estimated.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or group of assets (the "cash-generating unit").

An impairment loss is recognized if the carrying amount of a cash-generating unit exceeds its estimated recoverable amount. The recoverable amount of an asset or a cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cost flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the assets. Impairment losses are recognized in net income (loss).

Impairment losses recognized in prior years are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation, if no impairment loss has been recognized.

(ii) Financial assets

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognized in net income (loss) and reflected in an allowance account against receivables. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through net income (loss).

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Functional Currency

The functional and presentation currency if the Company is the Canadian dollar.

Investments in Associates

The Company has interests in associates. Associates are entities over which the Company exercises significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but without control or joint control over those policies. The Company accounts for associates using the equity method of accounting. Interests in associates accounted for using the equity method are initially recognized at cost. Subsequent to initial recognition, the carrying value of the Company's interest in an associate is adjusted for the Company's share of comprehensive income and distribution of the investee. The carrying value of associates is assessed for impairment at each statement of financial position date.

Comprehensive income (loss)

Comprehensive income (loss) is the change in the Company's net assets that results from transactions, events and circumstances from sources other than the Company's shareholders and includes items that are not included in net profit. Other comprehensive income consists of changes to unrealized gain and losses on available for sale financial assets, changes to unrealized gains and losses on the effective portion of cash flow hedges and changes to foreign currency translation adjustments of self-sustaining foreign operations during the period. Comprehensive income measures net earnings for the period plus other comprehensive income. Amounts reported as other comprehensive income are accumulated in a separate component of shareholders' equity as Accumulated Other Comprehensive Income. The Company has not had other comprehensive income since inception.

Adoption of new pronouncements

The Company adopted the following standards for the period ended August 31, 2018:

- IFRS 9 Financial Instruments
- IFRS 15 Revenue from Contracts with Customers
- IFRS 2 Share-based Payment

The mandatory adoption of the above revised accounting standards and interpretations on March 1, 2018 had no significant impact on the Company's condensed consolidated interim financial statements for the current period or prior year presented.

Future changes in accounting policies

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB or IFRIC (International Financial Reporting Interpretations Committee) that are mandatory for accounting periods noted below. Some updates that are not applicable or are not consequential to the Company may have been excluded from the list below.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Future changes in accounting policies (continued)

Standard is effective for annual periods beginning on or after January 1, 2019:

IFRS 16 Leases - In June 2016, the IASB issued IFRS 16 - Leases. IFRS 16 establishes principles for the recognition, measurement, presentation and disclosure of leases, with the objective of ensuring that lessees and lessors provide relevant information that faithfully represents those transactions. IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently. However, lessees are no longer classifying leases as either operating leases or finance leases as it is required by IAS 17.

The Company is currently evaluating the impact of the new standards on the Company's condensed consolidated interim financial statements.

4. INVESTMENT IN ASSOCIATES

DVG, LLC

On August 17, 2017, the Company, along with Sentinel Property Management Ltd. ("Sentinel") and Stratto, LLC ("Stratto") entered into a Joint Venture Agreement ("JV Agreement") to form DVG, LLC. ("DVG"), a US company incorporated on July 28, 2017 in Washington USA. According to the JV Agreement Crop has a 30% interest in DVG, and Sentinel has 20% and Stratto has 50%. The primary business in DVG is to complete greenhouse construction, lease land, facilities and agriculture infrastructure to licensed marijuana growers in the State of Washington ("Tenant-Growers").

Under the JV Agreement, the Company will raise money to fund the DVG greenhouse construction costs. In addition, the Company, Sentinel and Stratto have committed to providing combined funding of up to $150,000 annually to DVG in the event that DVG does not have sufficient revenue from operations to funds its operational costs. As of August 31, 2018, DVG had incurred $1,541,037 in construction in progress.

During the period ended August 31, 2018, DVG incurred a net loss of $1,877 and had assets of $1,663,405 and liabilities of $1,766,835 as at August 31, 2018. According to the JV Agreement, the net profit (loss) distribution would be 60% for the Company, 30% for Stratto and 10% for Sentinel. Accordingly, the Company's share of the net loss for the period ended August 31, 2018 is $563. As the Company's portion of the loss is greater than the carrying value of investment, the carrying value of the investment has been reduced to Nil and the unrecognized share of the net loss of DVG is $563.

Exercised	(10,047,000)
Cancelled	(3,247,000)
Balance, August 31, 2018	5,806,000

During the period ended August 31, 2018, the Company granted 19,100,000 stock options to certain directors, officers and consultants of the Company. The weighted average fair value of the stock options was determined to be $2,992,520 using the Black-Scholes option pricing model, which requires management to make estimates that are subjective and may not be representative of the actual results. Changes in assumptions can materially affect estimates of fair value. The following weighted average assumptions were used for the calculation:

Risk free interest rate	1.82%
Expected life (in years)	1.16 year
Expected volatility	144%
Expected dividend yield	0%
Expected forfeiture rate	0%

All options were vested immediately. During the six months ended August 31, 2018, 10,047,000 options were exercised for gross proceeds of $2,223,800 and 3,247,000 options were cancelled. Contributed surplus of $1,333,627 was also reversed upon exercised.

During the period ended August 31, 2018, the Company granted 500,000 stock options to directors and officers for share-based compensation of $1,238,828.

8. CAPITAL DISCLOSURES

The Company's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders. The Company considers the items included in shareholders' equity as capital. The Company manages the capital structure and makes adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets. The Company's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to fund the operation of the Company. To secure the additional capital necessary to pursue these plans, the Company intends to raise additional funds through the equity or debt financing. The Company is not subject to any capital requirements imposed by a regulator.

9. FINANCIAL INSTRUMENTS

As at August 31, 2018, the Company's financial instruments consist of cash, amounts receivable, loans and advances and accounts payable.

The Company provides information about financial instruments that are measured at fair value, grouped into Level 1 to 3 based on the degree to which the inputs used to determine the fair value are observable.

- Level 1 fair value measurements are those derived from quoted prices in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1, that are observable either directly or indirectly.
- Level 3 fair value measurements are those derived from valuation techniques that include inputs that are not based on observable market data.

Cash is measured using level 1 fair value inputs. The carrying values of the amounts receivable and loan and advances approximate their fair values because of the short-term nature of these instruments.

9. FINANCIAL INSTRUMENTS (continued)

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk is the risk that one party to a financial instrument will cause a loss for the other party by failing to discharge an obligation. As described in Notes 4 and 5, the loans and advances will be secured by various assets and properties which mitigates the credit risk. Therefore, the Company believes that the impact of credit risk is not significant.

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due.

Interest risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in market risk. At August 31, 2018 and February 28, 2018, the Company is not exposed to significant interest rate risk as it has no interest bearing debt.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company holds no financial instruments that are denominated in a currency other than US dollar. The Company is exposed to currency risk resulting from its investments in associates which are located outside of Canada.

10. COMMITMENT

MANAGEMENT'S DISCUSSION AND ANALYSIS

1.1 Date of Report: October 29, 2018

The following management's discussion and analysis ("MD&A") has been prepared as of October 29, 2018 and should be read in conjunction with the condensed interim consolidated financial statements and accompanying notes for the period ended August 31, 2018, which are prepared in accordance with International Financial Reporting Standards ("IFRS"). All amounts are stated in Canadian dollars unless otherwise indicated.

This MD&A includes certain statements that may be deemed "forward-looking statements". Forward-looking statements are often, but not always, identified by the use of words such as "anticipate", "plan", "estimate", "expect", "may", "project", "predict", "potential", "could", "might", "should" and other similar expressions. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, continued availability of capital and financing and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements.

1.2 Nature of Business

Crop Infrastructure Corp. (formerly Fortify Resources Inc.) ("Crop" or the "Company") was incorporated on May 31, 2011, under the British Columbia Business Corporations Act. 1.12 Changes in Accounting Policies

The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of the audited financial statements of the Company as at February 28, 2018. The unaudited condensed interim consolidated financial statements should be read in conjunction with the Company's audited financial statements for the 14 months ended February 28, 2018.

The Company adopted the following standards for the period ended August 31, 2018:

- IFRS 9 Financial Instruments
- IFRS 15 - Revenue from Contracts with Customers
- IFRS 2 Share-based Payment

The mandatory adoption of the above revised accounting standards and interpretations on March 1, 2018 had no significant impact on the Company's condensed consolidated interim financial statements for the current period or prior year presented.

Accounting standards issued but not yet applied

The following new standards and interpretations are not yet effective and have not been applied in preparing these financial statements. The Company is currently evaluating the potential impacts of these new standards and does not anticipate any material changes to the financial statements upon adoption of this new and revised accounting pronouncement.

Effective for annual periods beginning on or after January 1, 2019:

- IFRS 16 - Leases specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The extent of the impact of adoption has not yet been determined.

The Company is currently evaluating the impact of the new standards on the Company's condensed consolidated interim financial statements.

1.13 Financial Instruments and Other Instruments

The Company is exposed to varying degrees to a variety of financial instrument related risks:

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge any obligations. The Company's cash and receivables are exposed to credit risk. The Company reduces its credit risk on cash by placing these instruments with institutions of high credit worthiness and the loans and advances will be secured by the assets of DVG which mitigates the credit risk

Fair value

The carrying value of cash approximated the fair value because of the relatively short-term nature of these instruments.

Interest rate risk

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities with variable interest rates expose the Company to cash flow interest rate risk. The Company does not hold any financial liabilities with variable interest rates. The Company does maintain bank accounts which earn interest at variable rates but it does not believe it is currently subject to any significant interest rate risk.

Liquidity risk

The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances and through short-term borrowing. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments.

Financial assets and liabilities measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The fair value of loan and advances and accounts payable approximate fair value due to the short term nature of the financial instruments. Cash is classified as fair value through profit or loss and is measured using level 1 inputs of the fair value hierarchy.

1.14 Other MD&A Requirements

Disclosure of Outstanding Share Data

a. Authorized:

Unlimited common shares with no par value

b. Common Shares Issued:

Balance, August 31, 2018	110,671,282
Balance, October 29, 2018	121,976,278

As of this reporting date, there were 10,475,250 common shares held in escrow.

Risk Factors

The Company is focused on more select market introduction and development. The failure to generate future sales in the Company's main products could have a significant and adverse affect on the Company.

The Company success will depend in large measure on certain key personnel. The loss of the services of such key personnel could have a material adverse affect on the Company. The Company does not anticipate having key person insurance in effect for management. The contributions of these individuals to the immediate operations of the Company are of central importance. In addition, there can be no assurance that the Company will be able to continue to attract and retain all personnel necessary for the development and operation of its business.

The Company has incurred a net loss for the period ended August 31, 2018 of $9,244,686 and has a deficit of $10,003,618. Management is continuing efforts to attract additional equity and capital investors and implement cost control measures to maintain adequate levels of working capital. Nevertheless, there can be no assurance provided with respect to the successful outcome of these ongoing actions. If the Company is unable to obtain additional financing on reasonable terms, the Company may be required to curtail or reduce its operations to continue as a going concern.

In addition, the Company's limited working capital could affect the Company's ability to seize upon opportunities requiring investment, or to reinvest in its products in a timely manner.
