

## Far Resources Prepares to Mobilize Drill to its High-Grade Hidden Lake Lithium Project, NWT and Retains Renmark Financial Communications Inc.

**May 15, 2018** – Far Resources Ltd (CSE:FAT) (FSE:F0R) (OTC:FRRSF) ([www.farresources.com](http://www.farresources.com)) (“Far” or the “Company”) is pleased to announce it will be mobilizing a drill to its high-grade Hidden Lake Lithium Project, NWT, on May 20, 2018, targeting high-grade lithium-bearing pegmatites with an initial minimum 1,100 metre diamond drilling campaign. Far has signed the drill contract with Northtech Drilling for the program which will be helicopter supported by Great Slave Helicopters and managed in the field by Henry Lole. John Gorham (P.Geo. NWT) will be the supervising geologist.

Toby Mayo, Interim CEO of Far, stated, “The mobilization of the rig to Hidden Lake represents another significant milestone for the Company. It allows Far to expand its existing lithium portfolio while building on the technical successes we have achieved in Manitoba. We believe that this initial program at Hidden Lake will be equally as successful as our previous drilling campaigns at Zoro.”

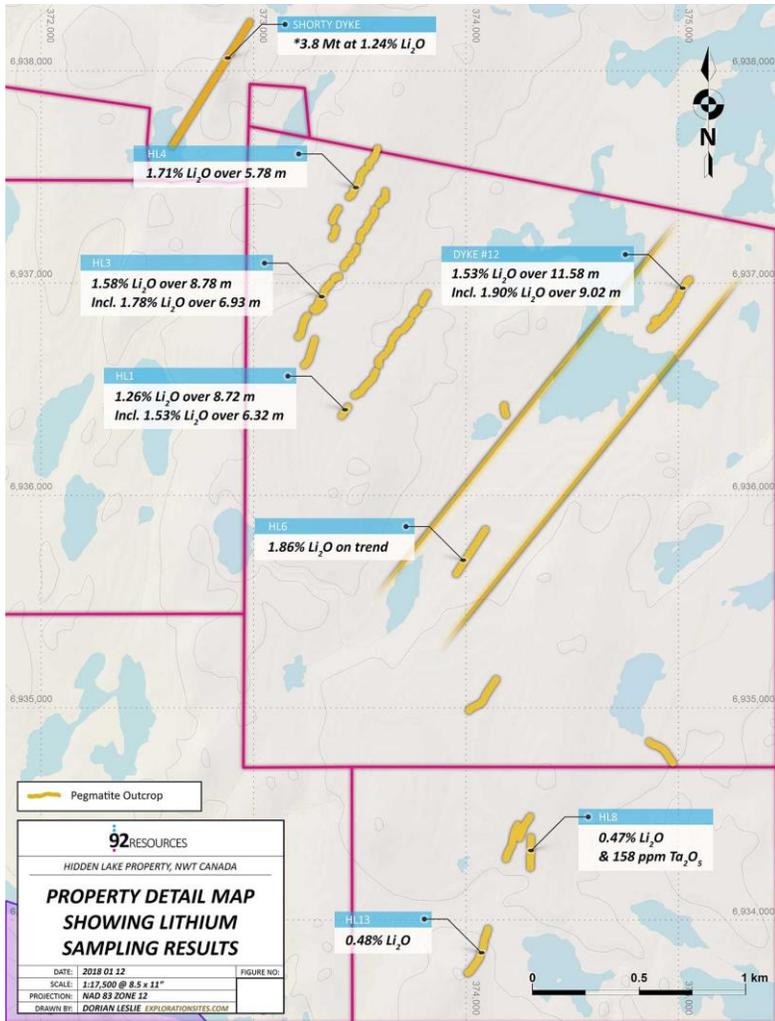

### **The Hidden Lake Lithium Project**

The Hidden Lake property covers 1,849 hectares and is located approximately 45 km east-northeast from Yellowknife, NWT. It can be reached from Yellowknife by the all-weather paved Ingraham Trail Highway (Highway 4), and/or by charter helicopter or float plane.

There are numerous lithium-bearing spodumene pegmatite dykes on the property, four of which were the focus of channel sampling and assaying by 92 Resources from whom Far has optioned the property. The channel samples confirmed significant lithium mineralization over substantial intervals for each of the four examined dykes, including a maximum value of 1.75% Li<sub>2</sub>O over 6.01 metres at the surface.

These four dykes will be the targets for this drill campaign with the intent to confirm historic high-grade lithium assays obtained from surface sampling and assess the widths and extent of the four target pegmatite dykes. The current drill program will support Far’s option to earn up to a 90% undivided interest in and to the Hidden Lake Property.

## Far Retains Remark

Far is pleased to announce that it has retained the services of Renmark Financial Communications Inc. (“Renmark”) to augment its existing investor relations activities with the retail brokerage community in North America.

“We are pleased to have selected Renmark to help reinforce Far’s profile with retail investors, and to enhance the visibility of our projects within this extremely important segment of the investing community. Renmark’s standards and methodology fit the message we wish to communicate to the investing public,” noted Far’s Interim CEO, Toby Mayo.

In consideration of the services to be provided, the Company has agreed to pay to Renmark a monthly retainer of \$5,000 per month beginning May 14, 2018. Renmark does not have any interest, directly or indirectly, in Far or its securities, or any right or intent to acquire such an interest.

## About the Company

Far is actively drilling its Zoro Lithium project located near Snow Lake, Manitoba, which covers a number of known lithium pegmatite occurrences. The Company has recently acquired an option on the Hidden Lake Property in NWT and is initiating drilling for continuity of spodumene mineralization to depth. In the United States,

**Far Resources Ltd.**
