**NEWS RELEASE**

**FUTURE FARM MAINE ENTERS NEXT PHASE OF CBD-RICH HEMP CROP  
PRODUCTION**

**Video Shows Activity Surrounding Transplantation of the Plants**

June 20, 2019 – *Vancouver, British Columbia* - Future Farm Technologies Inc. (the “Company” or “Future Farm”) (CSE: FFT) (OTCQB: FFRMF) is pleased to provide an update to [last week’s announcement](#) that it has begun transplanting its young Cherry Wine hemp plants from the Belfast, Maine propagation facility into the field at its Hersey, Maine farm.

With nearly 50% of the field already sown, Future Farm is running at peak efficiency and outpacing last year’s preparations. [Watch here for a look at all the action on Future Farm Maine’s hemp farm:](#)

The Company expects to have approximately 200,000 healthy plants completely transplanted into the fertile ground by June 25th. This will allow for ample light hours, carefully calculated to

develop CBD and flowering. Future Farm has provided over 15 full-time jobs to craftsmen and residents from the rural surroundings of its farm, adding to the economic viability to the area.

Future Farm is also pleased to announce that representatives of the Company attended The Hemp Industry Daily Conference in New Orleans, Louisiana last week with the goal of developing a robust sales pipeline to ensure that its 2019 harvest will make its way to market in the shortest time possible. The Company anticipates harvest should occur late summer or early fall.

"Our success would not be possible without the support of government officials, local employees and the fine craftsmen and women of Maine," says George Groccia, Future Farm's Project and Operations Manager. "I'm impressed with how efficiently the entire team is running. We've got some healthy plants that will make for valuable and important CBD coming out of the northeast hemp-for-wellness market."

For further information, contact William Gildea, Director, at (888) 387-3761.

**About Future Farm Technologies Inc.**

Future Farm is a Canadian company with holdings throughout North America including California, Massachusetts, Florida, Maine, Puerto Rico and Newfoundland. The Company's mission is to advance sustainable agriculture through production of wholesale and retail cannabis products, including hemp. As a leader in its field, Future Farm is committed to using only the highest quality processes and products. Towards this goal, the Company acquires or partners with licensed cannabis operators, and acquires or develops leading technologies in cannabis production, breeding, genetics, and Controlled Environment Agriculture (CEA). Future Farm's scalable, indoor CEA systems utilize minimal land, water and energy resources. The Company holds an exclusive, worldwide license to use a patented vertical farming technology that, when compared to traditional plant production methods, generates yields up to 10 times greater per square foot of land.
