### **NEWS RELEASE**

#### **FUTURE FARM COMPLETES FILING OF 2018 AUDIT**

July 20, 2018 – Vancouver, British Columbia – Future Farm Technologies Inc. (the “Company”) (CSE: FFT) (OTCQX: FFRMF) announces that its 2018 annual audited financial statements (the “Annual FS”), related management’s discussion and analysis (the “Annual MD&A”), and CEO and CFO certifications (collectively, the “Annual Required Filings”) were filed on Wednesday, July 18, 2018.

The Company had an active year of mergers and acquisitions, which successfully expanded and diversified its portfolio of assets. This level of activity caused delays in the audit process and the completion of the Annual Required Filings, which ultimately resulted in a cease trade order (CTO) being issued by the British Columbia Securities Commission (BCSC) on July 6, 2018. The BCSC confirms that all materials have been received and that revocation of the CTO is being processed.

“We are pleased to have completed the Annual Required Filings and thank our shareholders for their patience during the CTO. We are eager to fully return our focus to building Future Farm and value for our investors,” states Mr. William Gildea, Future Farm’s Chairman and CEO.

For further information, contact William Gildea, Director, at 617.834.9467.

On behalf of the Board,

William Gildea, CEO & Chairman

#### **About Future Farm**

Future Farm Technologies Inc. is a Canadian company with projects throughout North America including California, Florida and Maryland. The Company’s business model includes developing and acquiring technologies that will position it as a leader in the evolution of Controlled Environment Agriculture (CEA) for the global production of various types of plants, with a focus on cannabis. Future Farm provides scalable, indoor CEA systems that utilize minimal land, water and energy regardless of climate, location or time of year and are customized to grow an abundance of crops close to consumers, therefore minimizing food miles and its impact to the environment. The Company holds an exclusive, worldwide license to use a patented vertical farming technology that, when compared to traditional plant production methods, generates yields up to 10 times greater per square foot of land. The contained system provides many other benefits including *90% less water, fertilizer and land used, less travel costs, seed to sale security, scalability, consistency due to year-round production, cost control, product safety and purity by eliminating environmental variability*. The Company also utilizes a leading cannabis oil extraction technology, which enables the Company to process 20lbs/hour of cannabis plant to yield approximately 908 grams/hour of oil.

The Company is also in the business of designing and distributing LED lighting solutions utilizing the COB and MCOB technology. The Company is focused on delivering cost efficient lighting to North America via advanced e-commerce sites the Company owns and operates. LEDCanada.com, which

caters to B2B customers, is a supplier of the newest and highest demand LED solutions. The Company also owns and operates COBGrowlights.com, which caters to both large and small agriculture green houses and controlled cultivation centers.

The Company recently acquired the exclusive right to use a patented, augmented reality (AR) technology in the cannabis industry. As described in more detail above, the Company has decided to spin this asset off to its shareholders.
