NEWS RELEASE

**FUTURE FARM’S CBD HEMP CULTIVATION OPERATIONS PREPARE FOR
HARVEST IN MAINE, ADD NEW PROJECT LEADERSHIP**

August 8, 2018 – Vancouver, British Columbia – Maine farmers will soon have access to an estimated 15,000,000 organic, feminized high-CBD hemp seeds from Future Farm Technologies Inc. (the “Company” or “Future Farm”) (CSE: FFT) (OTCQX: FFRMF). After initial setbacks due to the discovery of ledge at its leased farm in Hersey, Maine and seed delivery delays, the Company announced the hiring of Nathan Gray to provide professional consulting services for industrial hemp cultivation and processing operations and management.

The Company has implemented additional operational procedures as part of its ongoing efforts to be the largest hemp cultivator and CBD producer in New England. Under Mr. Gray’s leadership, the Company estimates that its Maine farms will produce approximately 26,000 pounds of biomass in 2018. That amount is expected to increase to 200,000 pounds in 2019. Costs associated with biomass and seed projections are estimated to be \$1M-\$1.5M annually.

“Nate proved himself in the great work he did at our Rhode Island property,” said William Gildea, CEO and Chairman of Future Farm. “His hands-on approach and experience will help make our Belfast, Maine facility the go-to organic hemp resource local farmers need to energize Maine’s agricultural industry.”

Earlier this summer the United States Senate passed a farm bill that included hemp legislation spearheaded by Senate Majority Leader Mitch McConnell. Known as the Hemp Farming Act, the legislation, if enacted into law, would remove industrial hemp from the list of controlled substances under federal law. According to the hemp advocacy group Vote Hemp, the number of acres of hemp grown across the 19 states that have legalized hemp’s cultivation more than doubled in 2017, up to a total of 23,343 acres. In Maine, state horticulturist Gary Fish, who oversees the hemp program for the Department of Agriculture, Conservation and Forestry, estimated at least [888 acres](#) to be in hemp production in Maine this summer.

About Future Farm Technologies Inc.

Future Farm is a Canadian company with holdings throughout North America including California, Massachusetts, Florida, Maine, Puerto Rico and Newfoundland. The Company's mission is to advance sustainable agriculture through production of wholesale and retail cannabis products, including hemp. As a leader in its field, Future Farm is committed to using only the highest quality processes and products. Towards this goal, the Company acquires or partners with licensed cannabis operators, and acquires or develops leading technologies in cannabis production, breeding, genetics, and Controlled Environment Agriculture (CEA). Future Farm's scalable, indoor CEA systems utilize minimal land, water and energy resources. The Company holds an exclusive, worldwide license to use a patented vertical farming technology that, when compared to traditional plant production methods, generates yields up to 10 times greater per square foot of land.
