NEWS RELEASE

**FUTURE FARM OFFERS CHERRY WINE HEMP SEEDS FOR SALE
AT DISCOUNTED RATE**

Elite strain for CBD-producing hemp available now at FutureFarmShop.com

February 28, 2019 – Vancouver, British Columbia – Future Farm Technologies Inc. (the “Company” or “Future Farm”) (CSE: **FFT**) (OTCQB: **FFRMF**) is proud to announce that hemp seeds processed from Future Farm Maine’s 2018 harvest are now available to order online at FutureFarmShop.com.

Cherry Wine seeds are known for their cannabidiol (CBD) content and outstanding genetic stability year-over-year. While individual propagation rates will vary based on grow methodology, soil and other environmental factors, Future Farm’s testing of the seeds showed an 85% germination rate. Independent laboratory testing shows CBD levels at 12.3% and THC content to be within legal limits. Lab results are available upon request.

The seeds being sold have been treated for feminization, but the Company has not yet received confirmation that the treatment was successful. While Future Farm awaits feminization-testing results, buyers may purchase seeds at a significant discount. Once the feminization results are confirmed, prices will increase. A minimum purchase of 2,000 seeds is required and may be requested by visiting FutureFarmShop.com or by sending an inquiry to sales@futurefarmtech.com.

Future Farm Maine is a subsidiary of Future Farm Technologies Inc. For further information, contact Investor Relations at investor@futurefarmtech.com or (888) 387-3761 ext. 710.

On behalf of the Board,

Future Farm Technologies Inc.

William Gildea, CEO

About Future Farm Technologies Inc.

Future Farm is a Canadian company with holdings throughout North America including California, Massachusetts, Florida, Maine, Puerto Rico and Newfoundland. The Company’s mission is to advance sustainable agriculture through production of wholesale and retail cannabis products, including hemp. As a leader in its field, Future Farm is committed to using only the highest quality processes and products. Towards this goal, the Company acquires or partners with licensed

cannabis operators, and acquires or develops leading technologies in cannabis production, breeding, genetics, and Controlled Environment Agriculture (CEA). Future Farm's scalable, indoor CEA systems utilize minimal land, water and energy resources. The Company holds an exclusive, worldwide license to use a patented vertical farming technology that, when compared to traditional plant production methods, generates yields up to 10 times greater per square foot of land.
