NEWS RELEASE

FUTURE FARM COMPLETES FILING OF 2019 AUDIT

July 16, 2019 – Vancouver, British Columbia – Future Farm Technologies Inc. (the “Company”) (CSE: FFF) (OTCQB: FFRMF) announces that its 2019 annual audited financial statements (the “Annual FS”), related management’s discussion and analysis (the “Annual MD&A”), and CEO and CFO certifications (collectively, the “Annual Required Filings”) were filed on Monday, July 15, 2019.

As [previously announced](#), it was originally expected that the Annual Financial Filings would be completed prior to the filing deadline of June 28, 2019, however the Company was notified by its auditor that the audit of the Company’s 2018 annual financial statements was selected for review by the Canadian Public Accountability Board (“CPAB”), prompting additional review procedures and therefore delays.

The British Columbia Securities Commission (“BCSC”) confirms that all materials have been received and that the revocation of the management cease trade order (“MCTO”) restricting trading in the Company’s securities by insiders is being processed.

“We are pleased to have completed the Annual Required Filings and thank our shareholders for their patience during the MCTO. We are eager to fully return our focus to building Future Farm’s business and value for our investors,” states Mr. William Gildea, Future Farm’s Chairman and CEO.

For further information, contact William Gildea, Director, at (888) 387-3761.

On behalf of the Board,

Future Farm Technologies Inc.

William Gildea, CEO

About Future Farm Technologies Inc.

Future Farm is a Canadian company with holdings throughout North America including California, Massachusetts, Florida, Maine, Puerto Rico and Newfoundland. The Company’s mission is to advance sustainable agriculture through production of wholesale and retail cannabis products, including hemp. As a leader in its field, Future Farm is committed to using only the highest quality processes and products. Towards this goal, the Company acquires or partners with licensed

cannabis operators, and acquires or develops leading technologies in cannabis production, breeding, genetics, and Controlled Environment Agriculture (CEA). Future Farm's scalable, indoor CEA systems utilize minimal land, water and energy resources. The Company holds an exclusive, worldwide license to use a patented vertical farming technology that, when compared to traditional plant production methods, generates yields up to 10 times greater per square foot of land.
