Date: [April 6, 2021 \(for the month of March 2021\)](#)

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer’s obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer’s ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are “material information” as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term “Issuer” includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

[The Issuer is a Canadian gold exploration company based in Vancouver. The Issuer seeks exciting data rich gold projects with low capital requirements. The Issuer holds a 100% interest in three Canadian gold projects, the Sixtymile Project located in within west-central Yukon Territory, the New Brenda project located in the Similkameen, Nicola, and Osoyoos Mining Divisions, BC and the Ashuanipi Project located 30 to 90 kilometres west and north-west of](#)

Schefferville, Quebec, and within the Ashuanipi Complex in the northeastern portion of the Superior Province, Quebec.

2. Provide a general overview and discussion of the activities of management.

During the month of **March 2021**, management's principal activities consisted of:

- announcing the results from the 2020 drill program the Sixtymile Project;
- the preparation and filing of the Issuer's second quarter interim financial statements and MD&A for the quarter ended January 31, 2021; and
- attending to general management and administrative matters.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

During the month of March 2021, the Issuer announced the results of historical drill sampling on the Sixtymile Project, in the Sixtymile placer district within the traditional territory of the Tr'ondëk Hwëch'in First Nation.

- 5.6 g/t Au over 1.5 m in SM20-02 from 10.7 to 12.2 m
- 4.0 g/t Au over 1.5m in SM20-09 from 35.1 to 36.6 m
- Wider intervals with anomalous gold detected in SM20-14 and SM20-15

A total of 15 RAB drill holes between 40 – 60 m depth were drilled in the fall of 2020. The drill holes tested a series of structures that were interpreted from a prior ground geophysical survey.

Hole SM20-2 targeted the confluence of two faults and intersected 5.6 g/t Au over 1.5m from 10.7 to 12.2m. SM20-09 targeted a break visible in ground magnetic data where a fault appears to offset Klondike schist from metasediments. This drill hole intersected 4.0 g/t Au over 1.5m from 35.1 to 36.6m.

Five RAB holes and two trenches intersected wider anomalous but low-grade-zones. The geophysical and drill data, including downhole OTV surveys will be integrated over the coming months to identify the controls on mineralization, which will lead to enhanced and more efficient targeting for future programs.

Historical drill core from south of Miller Creek was resampled and yielded 12.8 g/t Au over 2.1 m from 41.15m to 43.28m as previously released in news dated February 1st. The company plans to use the same geophysical surveys and targeting methods on the south Miller Creek zones as they have the same rock type and alteration as the targets on Glacier Creek.

Trenching revealed visible gold in arsenopyrite-quartz veins and grab samples ranged up to 0.6 g/t Au. The trenching was performed on a small and discrete zone of coarse-grained placer gold to test the association with bedrock gold.

The intersects and data show that the Sixtymile Project is underlain by a complex auriferous fault set which partly occurs underneath the placer occurrences. The drillhole data is currently being interpreted in the context of regional, project, and occurrence scale geophysics to plan future geophysical programs and drilling. The interpreted dataset will allow for the findings on Upper Glacier Creek to be expanded to the remainder of the claim block.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer’s market(s) or political/regulatory trends.

The trends and risks which are likely to impact the Issuer are detailed in the Issuer’s MD&A for the 2nd quarter ended January 31, 2021 dated as of March 31, 2021 under the headings “FINANCIAL INSTRUMENTS”, OTHER RISKS AND UNCERTAINTIES” and “RISKS AND UNCERTAINTIES”. The MD&A is available on the Issuer’s SEDAR profile at www.sedar.com.

In addition to the trends and risks detailed in the MD&A, COVID-19 is likely to impact the Issuer:

COVID-19

The outbreak of the corona virus pandemic has impacted the Issuer’s plans and activities. The Issuer may face disruption to operations, supply chain delays, travel and trade restrictions and impact on economic activity in affected countries or regions can be expected and can be difficult to quantify. Such pandemics or diseases represent a serious threat to maintaining a skilled workforce industry and could be a major health-care challenge for the Issuer. There can be no assurance that the Issuer’s personnel will not be impacted by these pandemic diseases and ultimately that the Issuer would see its workforce productivity reduced or incur increased medical costs/insurance premiums as a result of these health risks. In addition, the COVID-19 pandemic has created a dramatic slowdown in the global economy. The duration of the COVID-19 outbreak and the resultant travel restrictions, social distancing, Government response actions, business closures and business disruptions, can all have an impact on the Issuer’s operations and access to capital. There can be no assurance that the Issuer will not be impacted by adverse consequences that may be brought about by the COVID-19 pandemic on global financial markets may reduce resource prices, share prices and financial liquidity and thereby that may severely limit the financing capital available.
