

## FORM 7

### MONTHLY PROGRESS REPORT

Name of Listed Issuer: Flow Metals Corp. (the "Issuer").

Trading Symbol: FWM

Number of Outstanding Listed Securities: 31,698,123 common shares were issued and outstanding as of October 31, 2021

Date: November 3, 2021 (for the month of October 2021)

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

#### **General Instructions**

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

#### **Report on Business**

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer is a Canadian gold exploration company based in Vancouver. The Issuer seeks exciting data rich gold projects with low capital requirements. The Issuer holds a 100% interest in three Canadian gold projects, the Sixtymile Project located in within west-central Yukon Territory, the New Brenda project located in the Similkameen, Nicola, and Osoyoos Mining Divisions, BC and the Ashuanipi Project located 30 to 90 kilometres west and north-west of Schefferville, Quebec,

and within the Ashuanipi Complex in the north-eastern portion of the Superior Province, Quebec.

2. Provide a general overview and discussion of the activities of management.

During the month of **October 2021**, management's principal activities consisted of:

- Providing an update on the Yukon Sixtymile gold project 2021 RAB drill program which targeted 3 gold zones: Easter Egg, Miller Creek and Glacier Creek; and
  - attending to general and administrative matters.
3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

During the month of October 2021, the Issuer provided an update on the Yukon Sixtymile gold project 2021 RAB drill program. The program targeted 3 gold zones: Easter Egg, Miller Creek and Glacier Creek.

The Easter Egg zone drilling followed up on four historical diamond drill holes done in 2010- 2011. A re-assay using metallic screen for coarse gold mineralization showed DDH-11-18 highlighted a potential discovery hole with an intercept of 12.81 g/t over 2.1m first reported February 1, 2021. Follow up drilling from June 2021 has confirmed 2 horizons of gold mineralization at the Easter Egg target while remaining open in all directions and at depth. The horizons dip to the west and are related to sets of veins perpendicular to the host rock foliation. The eastern mineralized horizon has a true thickness of roughly 50 to 60m wide whereas the western horizon has never been fully penetrated. The Easter Egg drill collars lie within a gold-in-soil anomaly covering 3000m X 2300m in the center of the property. Further, a pair of large faults trend over 2000m to the northeast through a patch of untested ground towards the richest historic placer from Glacier Creek.

### Updated Geological Model

The 2021 drill program revealed the orientation of mineralized veins and how these veins relate to the host rock foliation. Historic drilling intercepted the mineralized horizons, but insufficient drilling was done to assess the strike and dip of the mineralization. Some of the historic holes were drilled downdip of the mineralization. The combined RAB and historic diamond drilling data now reveal that the gold horizons dip to the west. Understanding the orientation of these mineralized veins sets the stage for an expanded follow-up program in 2022.

Glacier Creek - The results from of the drilling of Glacier Creek missed significant mineralization. There are additional targets further down Glacier Creek based on increased historical placer production further downstream. The company is working through the recently commissioned structural analysis provided by Jeremy Rimando and Alexander Peace from McMaster University through the Mitacs Accelerate Internship Project to help better interpret this target zone.

Miller Creek - The RAB drill was not able to reach definitive bedrock and ended up drilling through soil and regolith. Multiple Gold hits of up to 2.7g/t over 1.5m were intersected but cannot be definitively attributed to bedrock mineralization at this time. An RC drill is needed to case below the 15m of over burden. This target remains untested and a priority for next season.

The company plans to return with a Reverse Circulation (RC) drill next season to further define both the Easter Egg target and the Miller Creek targets.

### QAQC/Sampling procedure

RAB Samples were obtained by GroundTruth Drilling. The chips were collected from the drill in buckets then fed through a splitter. This separates the sample, collecting 20% of the chips (roughly 4kg) while leaving 80% behind. The samples were retained and sealed with tamperproof ties. A chain of custody was maintained from drill site to Dawson City, where they were shipped to MSALABS in Burnaby BC using Manitoulin Transport. All samples were sent for metallic screen analysis to better test for coarse and fine gold. Duplicates and blanks were provided by the lab.

Don Sheldon	Director
Brian Murray	Director, Chief Financial Officer
Adrian Smith	Director
Michael Woods	Corporate Secretary

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer’s market(s) or political/regulatory trends.

The trends and risks which are likely to impact the Issuer are detailed in the Issuer’s MD&A for the 3rd quarter ended April 30, 2021 dated as of June 22, 2021 under the headings “FINANCIAL INSTRUMENTS”, OTHER RISKS AND UNCERTAINTIES” and “RISKS AND UNCERTAINTIES”. The MD&A is available on the Issuer’s SEDAR profile at [www.sedar.com](http://www.sedar.com) and on the Issuer’s disclosure hall with the CSE at [www.thecse.com](http://www.thecse.com).

In addition to the trends and risks detailed in the MD&A, COVID-19 is likely to impact the Issuer:

**COVID-19**

The outbreak of the corona virus pandemic has impacted the Issuer’s plans and activities. The Issuer may face disruption to operations, supply chain delays, travel and trade restrictions and impact on economic activity in affected countries or regions can be expected and can be difficult to quantify. Such pandemics or diseases represent a serious threat to maintaining a skilled workforce industry and could be a major health-care challenge for the Issuer. There can be no assurance that the Issuer’s personnel will not be impacted by these pandemic diseases and ultimately that the Issuer would see its workforce productivity reduced or incur increased medical costs/insurance premiums as a result of these health risks. In addition, the COVID-19 pandemic has created a dramatic slowdown in the global economy. The duration of the COVID-19 outbreak and the resultant travel restrictions, social distancing, Government response actions, business closures and business disruptions, can all have an impact on the Issuer’s operations and access to capital. There can be no assurance that the Issuer will not be impacted by adverse consequences that may be brought about by the COVID-19 pandemic on global financial markets may reduce resource prices, share prices and financial liquidity and thereby that may severely limit the financing capital available.

## Certificate of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.
