Since December 2019, the COVID-19 pandemic has led governments worldwide to enact emergency measures to combat the spread of the virus. These measures, which included, among other things, the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally, resulting in an economic slowdown. Such events may continue to result in a period of business disruption, and in reduced operations, any of which could have a material adverse impact on the Issuer's results of operations, financial condition and the market and trading price of the Issuer's securities.

As of the date of this Monthly Progress Report, the duration and eventual impact of the COVID-19 pandemic remains unknown. In particular, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Issuer. A number of businesses have suspended or scaled back their operations and development for precautionary purposes or as governments have maintained a state of emergency or taken other actions. The breadth and ongoing impact of the COVID-19 pandemic on investors, businesses, the global economy and financial and commodity markets may also have a material adverse impact on the Issuer's results of operations and financial conditions and the market and trading price of the Issuer's securities.
