Overview

In April 2021, the Issuer completed its initial drilling program on its Southern Star Property and commenced drilling on its Chubb Lithium Property. The Southern Star is located along the Lower Detour deformation zone, part of the Sunday Lake-Detour crustal scale structural domain recognized for its relation to gold deposits in east central Quebec. The Chubb Lithium property is located 25 kilometres north of the mining community of Val d'Or, Quebec within the La Corne Pegmatite Field which is host to North American Lithium's deposit.

Southern Star Targets

The Southern Star first-pass drill program consisted of four diamond drill holes targeting depths of 600 metres each for a total of about 2,400 metres. The Issuer is awaiting assay results.

Chubb Targets

After demobilizing from the Southern Star property in the Fenelon Gold Camp, the drill rig was immediately mobilized onto the Chubb Lithium Property for a drilling program consisting of 14 diamond drill holes totalling 2,100 metres.

In 2017, the Issuer drilled three holes totalling 306 metres, the results from which included 1.33% Li₂O over 5.3 metres in hole C-17-01. Diamond drilling by Wrightbar Mines in 1994 intersected 3.7 metres grading 1.68% Li₂O, 2.74 metres grading 1.00% Li₂O and 2.4 metres grading 1.25% Li₂O. The objective of the current drill program is to extend the lithium-bearing pegmatites along strike and at depth.

Since December 2019, the COVID-19 pandemic has led governments worldwide to enact emergency measures to combat the spread of the virus. These measures, which included, among other things, the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally, resulting in an economic slowdown. Such events may continue to result in a period of business disruption, and in reduced operations, any of which could have a material adverse impact on the Issuer's results of operations, financial condition and the market and trading price of the Issuer's securities.

As of the date of this Monthly Progress Report, the duration and eventual impact of the COVID-19 pandemic remains unknown. In particular, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Issuer. A number of businesses have suspended or scaled back their operations and development for precautionary purposes or as governments have maintained a state of emergency or taken other actions. The breadth and ongoing impact of the COVID-19 pandemic on investors, businesses, the global economy and financial and commodity markets may also have a material adverse impact on the Issuer's results of operations and financial conditions and the market and trading price of the Issuer's securities.
