MONTHLY PROGRESS REPORT

Name of Listed Issuer: Silver Dollar Resources Inc. (the "Issuer")

Trading Symbol: SLV

Number of Outstanding Listed Securities: 75,585,305

Date: April 2, 2026

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.

- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. *Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.*

During the month of March 2026, the Issuer reported it has hired Versa Perforaciones to conduct a 3,500-metre diamond drilling program at its flagship La Joya Silver (Cu-Au) Project in the state of Durango, Mexico.

The Issuer remains focused on its shift in exploration strategy. The strategy is moving from potential open pit to underground exploration and development at the 100%-owned La Joya property (the "Property"). The current areas of focus are outside the historic resource areas, near the sides of the intrusive bodies. These areas share similarities with the mineralization style at the nearby San Martín mine. San Martín is located about 25 kilometres (km) southeast of La Joya (Figure 1).

The discovery of San Martín-type mineralization on the Property (specifically at the Coloradito Intrusive, "El Brazo") provides evidence supporting the concept of deeper mineralization around the main intrusions at La Joya.

Several targets are being developed (Figure 2) to drill test for deep San Martin-type mineralization below known (previously reported) mineralization or magnetic anomalies just off the sides of the intrusives.

About La Joya Property

La Joya is an advanced exploration stage property comprising 15 mineral concessions totaling 4,646 hectares and hosts the Main Mineralized Trend (MMT), Santo Nino, and Coloradito deposits.

The Property is situated approximately 75 km southeast of Durango, the state capital city, in a high-grade silver region with past-producing and operating mines, including Silver Storm's La Parrilla Mine, Industrias Penoles' Sabinas Mine, Grupo Mexico's San Martin Mine, First Majestic's Del Toro Mine, and Pan American Silver's La Colorada Mine (Figure 1).

The previous operator, Silvercrest Mines, released a Preliminary Economic Assessment (PEA) NI 43-101 Technical Report for the Property in December 2013. The PEA included a mineral resource estimate (MRE) for only the MMT and Santo Nino deposits (see [Historical MRE Table](#)) that was primarily based on Silvercrest's drilling between 2010 and 2012. The MRE was reported to conform to CIM definitions and standards for resource estimation at that time. However, a qualified person of the Issuer has not done sufficient work to classify the historical resource, and the Issuer is not treating it as a current mineral resource. Independent data verification and an assessment of the mineral resource estimation methods are required to verify the historical mineral resource.
