Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

On April 11, 2019, the Company reported that its wholly owned subsidiary MGX Renewables Inc. ("MGXR") received conditional approval to list its shares on the Canadian Securities Exchange. MGXR expects the listing to be finalized and shares to commence trading shortly.

On April 18, 2019, the Company reported that its collaborative research partnership with the University of British Columbia ("UBC") has successfully developed a novel hybrid organic-inorganic material for use in engineering silicon interfaces. These interfaces will prove critical in achieving a highly efficient, long-lasting silicon anode that will aid in the development of next generation lithium-ion batteries capable of quadrupling energy density from the current standard of 100 Wh/kg up to 400 Wh/kg for use in long-range electric vehicles and grid-scale energy storage.

In addition to developing silicon interfaces, the Company and UBC are also currently conducting process optimization on metallurgical grade silicon. The goal is to utilize low-cost metallurgical-grade silicon as a feedstock to fabricate nanostructured silicon. The overall objective of the MGX/UBC two-year research program is to develop a low-cost and scalable method that will fabricate a silicon-based anode to improve the energy density of Liion batteries.

2. Provide a general overview and discussion of the activities of management.
