Report on Business

On November 12, 2021, the Issuer announced it that follow up work was planned on till anomalies identified during its Phase Two (2) exploration program on the 100% owned "Elon Lithium Property" (the "Property").

A follow-up till sampling campaign is planned for the month of November 2021. The survey will consist of pit digging in till to retrieve boulders and clasts in the areas that are of interest regarding lithium exploration, including the two (2) recently identified anomalous areas in till (see news release dated October 6th, 2021). The objective of the survey is to obtain mineralization evidence from rocks and boulders of the previously prospected area in order to associate the source of the till anomalies with a mineralization style in the host rocks it originates from, and its correlated mineralogy and alterations.
