

GREEN 2 BLUE CORPORATE UPDATE

Vancouver, British Columbia – October 1st, 2019 - Green 2 Blue Energy Corp. (CSE: GTBE, OTCQB: GTGEF, FWB: 1NZ.F) ("**G2BE**" or the "**Company**") announces further to its previously announced news releases update of the Company's situation, summarized below:

- Between June and July 2019, according to Technical Service Agreement No.: SIMEC190517AZTS, between G2BE Poland Sp. z o.o. and Henan Sinovo Machinery Engineering Co. ("SIMEC"), Ltd. 2 engineers from SIMEC stayed in Poland for 40 days and together with the Polish team worked on installation/commissioning of wood sawdust drying plant. Main scope of work was installation of screw feeder/discharger/cyclone system for drying plant and hot air stove fuel mechanism adjustment. Unfortunately, they were not able to manage to bring the system to run in permanent operation and to obtain the expected results. The technical team in Poland, despite many attempts, due to very limited financial resources, were unable to repair the system to this day.
- On July 25, 2019 the Company has closed the first and only tranche of a non-brokered private placement of units (the "Units") at a price of \$0.05 per Unit, for gross proceeds of \$425,738 out of up to \$750,000 (the "Units Offering"). The net proceeds received from the Offering were used for general working capital, corporate and administrative purposes of the Company.
- April 26, 2019, the Company has completed the first tranche of a non-brokered private placement of unsecured convertible debentures (the "Debentures") of the Company in the aggregate amount of \$303,000.00 (the "Debenture Offering") out of planned up to \$2,500,000 of Debentures announced on February 7, 2019. Approximately \$1.2 million of the proceeds from the Debenture Offering were anticipated to be used to fund G2BE's purchase of the property and facility lease in Rzeczenica, Poland, inclusive of purchase of inventory required for the functioning of such facility, with an additional approximately \$330,000 being used to fund the facility lease payments and operating costs related to the Company's facility in Szczypkowice, Poland, and financing additional inventory required.

Because of unsuccessful the Debenture Offering and the Units Offering, the Company failed to realized the purchase of the property in Rzeczenica, to prepare and start operating a new pellet production facility in Szczypkowice and to complete announced on January 18, 2019 a buyout of the lease equipment of the initial pellet production line G2BE Production in Rzeczenica facility. In addition, the company decided to suspend the project related to mobile pellet lines ("MPLs") announced in NR on July 2, 2019 due to limited financial resources.

The Company's planned business objectives for 2019 to establish and increase production in both facilities and integrate a biomass gasification co-generation plant at the facility in Rzeczenica are not achievable because of insufficient funding available and because the current production does not provide sufficient funds to continue operations.

Green 2 Blue Energy Corp. cooperates with creditors in order to find a way to satisfy amounts due from creditors, and will be reviewing options including selling assets of the Company.

About G2BE

G2BE is a renewable energy company focused on residential and commercial wood pellet production and the implementation of biomass gasification technology to generate combined heat and power. G2BE's wood pellets are sold to retail outlets and power producers throughout Europe, including the United Kingdom, Germany, Poland, Italy and Denmark.
