The registered and records office of the Company is Suite 1500 - 1055 West Georgia Street, Vancouver, BC V6E 4N7. The Company designs and develops data technologies and applications for the medical cannabis industry.

These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at March 31, 2026, the Company has not generated significant revenues from operations and has current liabilities that exceed current assets by \$3,309,188 and accumulated deficit of \$27,987,572. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the Company’s ability to continue as a going concern. These financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern. These adjustments could be material. Management intends to finance operating costs over the next twelve months with private placements of common shares and loans from directors. While management has been successful in obtaining sufficient funding for its operating and capital requirements from the inception of the Company to date, there is no assurance that additional funding will be available to the Company, when required, or on terms which are acceptable to management.

9. Financial Risk and Capital Management

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk was on its cash. Management believes that the credit risk with respect to cash is minimal as balances are held with a high-credit quality financial institution.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company has a planning process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. Liquidity risk is assessed as high.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements, and loans. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding or loans.

Interest rate risk

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Management does not believe the Company is exposed to significant interest rate risk as cash is non-interest bearing and liabilities bear interest at a fixed rate as at March 31, 2026.

Foreign exchange risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company is not exposed to significant foreign exchange risk.

Fair value

The carrying value of cash, accounts payable and loan payable approximate their fair value due to the relatively short-term nature of these instruments.

Capital Risk Management

The Company defines its capital as shareholders' equity. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to continue the development of mobile applications. As the Company is in the preliminary stages of operations, its principal source of funds is from the issuance of common shares.
