1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

New Brunswick ("NB") Hemp Project

Drying of the biomass is complete at the project, the approximate 17.5 tonnes of material is currently being stored awaiting further processing. The partners continue to evaluate how best to monetize this material. At this point, they have had discussions with a number of potential purchasers of the biomass.

Management is in the process of securing hemp cultivars containing up to 4% cannabidiol (CBD) which would more than double the performance of cultivars used in 2018.

Scio Oregon High Yielding CBD Hemp Project

The Company is currently looking for approximately 4,000 sq. ft. of warehouse space to store the dried biomass produced from the 2018 harvest and to begin the hammer milling the material in preparation for further processing.

Extraction - Management continues to explore opportunities to partner with seasoned cannabinoid extraction businesses to potentially construct an extraction facility on site to process the 2018 and 2019 harvests.

Greenhouse Management - The team is preparing to install 3 phase power to support the supplemental lighting that will be used in the greenhouses for clone production.

Cloning Operations - Cloning of three hemp varieties for the 2019 season is well underway. These cultivars were selected for their high yielding CBD content, substantial Biomass yield, and ultra-low yielding THC, while having superior pest resistance and disease tolerance, as well as a shorter flowering period allowing for an earlier harvest before the rainy season. It is expected that cloning operations will produce upwards of 40,000 clones for the Covered Bridge Acres farm and potentially excess clones that can be sold to the market and/or provided to local farming partners.

Discussions with Local Farmers

Management continues discussions with a number of local farmers interested in consulting, contract farming and share cropping for the 2019 season.
