Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer (CSE:GOH) is a Canadian junior exploration Company focused on acquiring and exploring highly prospective land packages in North and South America. The Company's projects include (i) the flagship Magno Project, a district-scale polymetallic property adjacent to the historic Cassiar mining district in British Columbia; (ii) the Three Guardsman Project, which exhibits significant potential for copper and gold-skarn mineralization; (iii) the Copeçal Gold Project, located in Mato Grosso, Brazil with a 6km strike of anomalous gold in soil samples; and (iv) three critical mineral projects with extensive tenement packages totalling 123,900 hectares: Bahia South, Bahia North and Iguatu projects located in Brazil.

2. Provide a general overview and discussion of the activities of management.

During March 2026, management's principal activities included, but were not limited to, discussion on and the preparation of necessary documentation, in respect of:

- (i) General management and administrative matters;
- (ii) On March 24, 2026, the Company announced that it closed the first tranche of its previously announced \$2,000,000 non-brokered flow-through financing. The Company issued an aggregate of 6,482,417 flow-through shares at a price of \$0.265 each for total proceeds of \$1,717,840. In connection with the offering, the Company paid cash finder's fees totaling \$109,817 and issued 397,520 non-transferable finder warrants (each, a "Finder Warrant") to certain eligible arm's-length finders who introduced subscribers to the offering. Each Finder Warrant entitles the holder to purchase one Common Share (a "Finder Share") at a price of \$0.35 per Finder Share for a period of 24 months from the date of issuance. All securities issued in connection with the offering are subject to a hold period of four months and one day pursuant to applicable securities laws.

3. Describe & provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties & attach any mineral or oil & gas or other reports required under Ontario securities law.

During March 2026 the Company:

- (i) Announced the filing of an independent technical report titled "Magno Project, Liard Mining Division, BC." Exploration results, including exceptional silver-lead-zinc grades and significant indium enrichment, highlight the district-scale potential of the property;
- (ii) Completed a review of historical exploration data from three recently acquired mineral claims within its Magno Project in the Cassiar District of northern British Columbia. The claims, which expanded the property to over 37,200 hectares, host three historically explored mineral occurrences — a tungsten-molybdenum skarn at Lamb Mountain, an intrusion-related molybdenum system at Cassiar Moly, and a polymetallic volcanogenic massive sulphide (VMS) occurrence at Lang Creek — collectively demonstrating multiple mineralization styles within the broader Magno property;
