MONTHLY PROGRESS REPORT

Name of Listed Issuer: GeneTether Therapeutics Inc. (the "Issuer").

Trading Symbol: GTTX

Number of Outstanding Listed Securities: 49,166,648

Date: February 1, 2023

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

GeneTether Therapeutics Inc. is focused on developing its disruptive proprietary platform technology to significantly increase the efficiency of DNA insertion into the genome for gene correction and complementation strategies. The Issuer's wholly-owned platform technology uses a

proprietary method to “tether” donor DNA templates to the genome editing complex, making the template readily available for use during the genome editing repair stage. The Issuer is leveraging its platform technology to develop curative therapies for the treatment of rare genetic diseases. The Issuer’s proof of concept study demonstrated an approximately 7x higher gene editing efficiency as compared to the same gene editing payload without application of the Issuer’s technology.
