Trading Symbol: [FUTR](#)

Number of Outstanding Listed Securities: [148,748,487 common shares were issued and outstanding as of February 28, 2021](#)

Date [March 7, 2022 \(for the month of February 2022\)](#)

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

[The Issuer is an exploration mining company carrying on the business of acquisition and exploration of properties for mining of precious and base metals currently focused on the Hercules gold project, located in the Thunder Bay North Mining District.](#)

2. Provide a general overview and discussion of the activities of management.

During the month of February 2022, management's principal activities consisted of reports on the Company's second round of results for its inaugural diamond drill program (the "Drill Program") on the Hercules Gold Project in the Beardmore-Geraldton gold camp of northwestern Ontario (the "Hercules Project"). All six holes of the second round of results from the Drill Program intersected significant gold values ranging up to 36.7 grams per tonne Gold ("g/t Au") in hole HR22-07; and attending to general administrative matters.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

During the month of February, 2022, the Company reported on the second round of drill results holes at its Hercules property

Highlights of Drill Program to Date

• All ten drill holes sampled during the Drill Program intersected the Golden Mile zone ("GMZ").

• Of the 128 core samples assayed, 40 graded better than 100 ppb gold of which 17 samples returned analyses of 1,000 ppb gold or greater.

• Highest grade gold intersections include:

- drill hole HR22-06 with 3.52 metres ("m") of 5.91 grams per tonne gold ("g/t Au)that includes 0.80 m of 13.30 g/t Au;
- drill hole HR22-07 with 7.62 g/t Au over a width of 2.50 m, that includes 0.7 m of 36.70 g/t Au.

• In addition, a broad zone of lower grade returned 7.55 m averaging 1.12 g/t Au in hole HR22-10.

• The second round of drill results confirms the GMZ mineralization occurs in composite zones of one or more quartz veins with attendant sulphide-mineralization spatially associated with magnetic mafic rocks over core intervals of up to 11.0 m.

The six drill holes, HR22-05 to -10, have a total core length of 682 m and were drilled in January 2022. On January 24, 128 samples, including quality control and blank samples were shipped to the ActLabs facility in Geraldton, Ontario. A further round of re-assaying has been arranged on 26 selected split core that showed grades of 1.00 g/t Au or greater. The re-assaying is to check for grade variability due to potential nuggety nature of the Golden Mile mineralization.

For full details see the Company's news release of February 23, 2022.

The Company intends to continue to delineate the gold mineralization of the Hercules Project with its diamond drill program. This phase of the drill campaign is intended to finish with 10 holes drilled by early February.

In March, 2022 a detail ground magnetic geophysical survey will be conducted to supplement the Company's recent airborne magnetics survey and to give improved definition to the relationship of the mafic magnetic dykes, high-grade gold zones and smaller scale structures. A preliminary report on the airborne geophysical survey conducted by GoldSpot Discoveries Corp. (TSXV: SPOT) (OTCQX: SPOFF) is expected to be received within the next month. The Company will be designing its next stages for the exploration of the Hercules Project based upon targets defined by the geophysical surveys integrated with the drill results and compilation of the extensive historical data.
