MONTHLY PROGRESS REPORT

Name of Listed Issuer: Kuya Silver Corporation (the "Issuer").

Trading Symbol: KUYA

Number of Outstanding Listed Securities: 39,666,190

Date: April 1, 2021

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer (CSE: KUYA) (OTCQB: KUYAF) (FRANKFURT: 6MR) is a Canadian-based silver-focused mining company that owns the Bethania mine, and holds the concession, permits and other rights of the property located in Central Peru (the "Bethania Project"). The Bethania Project mine was in production until 2016, toll-milling its ore at various other concentrate plants in the region, the Issuer's plan is to implement an expansion and construct a concentrate plant at site before

restarting operations. The Bethania Project mine produced silver-lead and zinc concentrates from the run of mine material, until being placed on care and maintenance due to market conditions and lack of working capital.

2. Provide a general overview and discussion of the activities of management.

N/A

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

The Issuer commenced the Phase 1 drill program at the Bethania Project and has planned to drill 5,000 metres. The initial program will be split into two parts, approximately 4,000 metres are planned for the western third of the property testing all seven veins that make up the historical resource (see the Independent Technical Report on the Bethania Silver Project, dated August 29, 2019 and filed October 1, 2020 under the Issuer's profile at www.sedar.com). The assays and geotechnical measurements taken from this portion of the drill program will be used to complete the underground mine production plan, including an expansion from 100 tonnes per day to 350 tonnes per day. In addition, the Issuer expects to complete a National Instrument 43-101 technical report, including a resource estimate on completion of the drill program. The remaining 1000 metres will target the Española 2 area in this initial phase to confirm the extent of historical mining from the Española 2 adit, as well as testing other newly identified veins at surface that may be related to this mineralization. This series of drill holes is to be located approximately 900 metres east of the main adit and could substantially extend the strike length of the Bethania vein system.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.
