Newlox Gold Completes Electrical Upgrades for Plant 2

Vancouver, BC, 5 February 2024 – Newlox Gold Ventures Corp. (“Newlox” or the “Company”) (CSE: [LUX](#) | Frankfurt/Stuttgart: [NGO](#) | PINK: [NWLXF](#)) is pleased to announce that it has successfully completed the planned electrical upgrade at its Boston Project (Plant 2) in Costa Rica. Technicians from the state-owned power company operated on-site during the last week of January 2024 to make the final connections and install the high-voltage electrical meter. With the power now connected, Newlox Gold has resumed the testing of Plant 2 in anticipation of starting operations shortly.

Over the holidays, Newlox Gold received and installed equipment to facilitate the start of operations at Plant 2. Of particular importance, [given the global shortage of this equipment](#), was an electrical transformer, which was delivered and installed on site. The installation and connection of the power equipment represents a significant milestone in the Company’s operations. The Boston Project now benefits from connection to the Costa Rican grid, which is a stable and [98% renewable](#) electricity system.

The [Boston Project](#) is slated to become the Company’s second environmentally and socially responsible precious metals project in Costa Rica. The Project will process feedstock newly extracted from the Boston Mine by the Company’s local mining partners. At full scale, Newlox will operate the new Boston mill to process 150 tonnes per day of material grading +/- 15 grams per tonne gold with an anticipated gold recovery of 90%. All feedstock is to be provided by the Company’s mining partners, with profits to be split evenly between the parties.

“Management is delighted to report that the final electrical upgrades necessary to complete testing and begin operations at Plant 2 are now complete. The Company will be providing updates to the market as this procedure advances towards the start of commercial operations,” commented Ryan Jackson, CEO of Newlox Gold Ventures Corporation.

Forward-Looking Information

The information in this news release includes certain information and statements about management’s view of future events, expectations, plans and prospects that constitute forward-looking information. Forward-looking information includes, but is not limited to, the completion of the work programs currently underway and the results of these programs. These statements are based upon assumptions that are subject to significant risks and uncertainties. Because of these risks and uncertainties and as a result of a variety of factors, the actual results, achievements, or performance may vary materially from those anticipated and indicated by these forward-looking statements. The material risk factors that could cause actual results to differ include the risk that work undertaken by the Company may have unintended effects, the risk of delays in completing work, and the risk that the Company may not be able to raise sufficient funds and Force Majeure.

Although the Company believes that the expectations reflected in the forward-looking information are reasonable, it can give no assurances that the expectations of any forward-looking information will prove to be correct. Except as required by law, the Company disclaims any intention and assumes no obligation to update or revise any forward-looking information to reflect actual results, whether as a result of new information, future events, changes in assumptions, changes in factors affecting such forward-looking statements or otherwise. Neither Canadian Securities Exchange nor its Regulation Services Provider (as that term is defined in the policies of the Canadian Securities Exchange) accept responsibility for the adequacy or accuracy of this release).
