Ore mined increased 8% and ore grade also increased 24%. The combined effect was a 33% increase in contained ounces of gold mined during March 2021 compared to the previous month. There was also a 9% decrease in tonnes of waste mined.

During March 2021, the Company's Corihuarmi mine shipped 2,744 ounces of gold, 1,746 ounces more than the previous month (998 ounces). To date, 5,875 ounces has been shipped. During the same period of the previous year 5,195 ounces were shipped.

2. Provide a general overview and discussion of the activities of management.
In early March 2020, the Company reinforced the application of its health and safety protocols, which encapsulated the operations of the Corihuarmi mine and Ollachea project as far as possible against the worldwide crisis caused by COVID-19. To date, no significant disruptions on mining operations, gold production or sales have occurred.

On 30 March 2021 the Company announced it had retained Mining Plus to prepare a new NI 43-101 compliant PEA for its Ollachea Project considering a low capex start-up for the Ollachea project. Mining Plus advised that it could provide a PEA that would consider the viability of gravity-only processing initially, with an option for lixiviation (leaching) processing at a later date. The Company is confident that a PEA to consider this option should take less than half the time and cost less than half the cost of updating the Feasibility Study, moving up the timeline for project commencement. Mining Plus' scope of work includes:

- Review of the Minapampa Far East exploration target identified during our 2016 drill campaign.

- Definition of recovery from gravity-only processing based on both historic and new metallurgical testwork conducted in recent years.
- Review of alternatives for reduction of mine start-up CAPEX. This includes a review of gravity processing initially at 1,500 tonnes per day (“tpd”) with a ramp up to 3,000 tpd, and the option of future installation of a leaching plant.
- Review and optimization of tailings storage and management, considering its intended use for paste backfilling during mining operations, and possible future leach reprocessing (dependent on residual gold content).
- Review cost-effective options for earthworks and construction start up, focusing on staged development and optimizing pad dimensions to limit cut and fill

Mining Plus has advanced work on the PEA and we understand that it will be completed in summer 2021.

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer’s affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

In June 2015, the Company announced that it had arranged a \$70,000,000 secured finance facility (the "Bridge Loan") structured by the Peruvian state-owned development and promotion bank, Corporación Financiera de Desarrollo S.A. ("COFIDE") and syndicated through Goldman Sachs Bank USA. The Bridge Loan was part of a senior project credit facility of up to \$240,000,000 described in a letter of mandate signed by COFIDE and Minera IRL. This senior project credit facility was to be structured by COFIDE, in conjunction with Minera IRL, to build the Ollachea Gold Project (the "Ollachea Project").

In March 2017 COFIDE terminated the letter of mandate without providing any reason for their decision. The Bridge Loan was due for repayment in June 2017.

On 20 June 2017 the Company announced it had filed a request for an arbitration against COFIDE with the Arbitration Centre of the Lima Chamber of Commerce.

On 16 September 2019 the Company announced that the Court of Arbitration had issued its Arbitration Award. The Award provided that COFIDE must pay an aggregate amount of \$34.2 million for damages. The Court of Arbitration declared that it did not have jurisdiction to require repayment of the Bridge Loan because the Bridge Loan facility expressly provides that it is subject to the jurisdiction of the courts of New York. Subsequently, COFIDE filed a lawsuit for annulment of the Arbitration Award

On 31 December 2019 the Company signed a Memorandum of Understanding (“MOU”) with COFIDE which was extended several times until 7 November 2020. During this period both the collection of damages by the Company and the collection of the debt and/or interests by COFIDE remained suspended. The objective of the MOU was to allow both parties to reach an agreement in settlement of the obligations imposed by the Arbitration Award as well as related matters, including repayment of the Bridge Loan.

On 12 November 2020 the Company announced it had settled its dispute with COFIDE. The summary of the settlement is that the Company owes COFIDE US\$70 million in principal and US\$ 31.9 million of accrued interest (calculated to 10 November 2020) and COFIDE owes the Company US\$34.2 million in principal pursuant to the September 2019 Arbitration Award, plus interest from July 17, 2017 to the date of payment. The amounts due will be offset. The Company will pay the net balance to COFIDE within 36 months and COFIDE will withdraw its legal claim for annulment of the Arbitration Award.

The Bridge Loan is secured by the Ollachea Project’s assets, mining reserves, mining concessions and rights and a pledge of the shares of the Company’s subsidiary, Compañía Minera Kuri Kullu S.A., which holds the Ollachea Project. The assets of the Corihuarmi Mine are not included as a guarantee of the Bridge Loan. If the Company is not able to secure an alternative source of funds to repay the debt with COFIDE the Company may have to relinquish its ownership of the subsidiary, Compañía Minera Kuri Kullu S.A. and therefore the Ollachea Project.
