Number of Outstanding Listed Securities: 429,159,625

Date: June 5, 2026

#### Report on Business

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

**McFarlane Lake Mining Limited is a gold exploration company focused on advancing its portfolio of mineral properties. Its primary holding is the recently acquired Juby Gold Project located near the Timmins gold camp in the southern Abitibi greenstone belt of Ontario. Its other exploration properties include the McMillan and Mongowin gold properties, both of which have seen past production, located approximately 70 km west of Sudbury, Ontario. McFarlane also owns the Michaud/Munro property, located 115 km east of Timmins along the so-called ‘Golden Highway’.**

2. Provide a general overview and discussion of the activities of management.

**During June 2026, the Company focused on the exploration program for its Juby Gold Project. During the month, the Company continued drilling and environmental baseline studies on the property.**

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

**During May 2026, the Company continued drilling on its Juby Gold Project. The drill program was initiated in December 2025 and is expected to be total approximately 14,000 metres (“m”). The drilling program commenced at the 826 Zone and has now moved to the Golden Lake Zone.**

**The program’s strategy is to prioritize drilling areas within the Juby Gold Project that can add significant gold ounces to the gold resource, leveraging McFarlane’s knowledge from its latest geological review. The Juby Gold Project is defined by four gold resource areas: Juby, Golden Lake, Big Dome,**

and Hydro Creek. Golden Lake and Jubby have the most significant potential to add ounces to the existing resource. The drill program is also investigating the 826 Zone, which is located to the southwest of the existing defined resource.

On May 19, 2026, the Company released further results from its diamond drilling exploration campaign. Drill hole GL 26-74 at Golden Lake intersected 109.6 m of 0.69 g/t gold, including 23.4 m of 1.24 g/t gold and 6.3 m of 2.47 g/t gold. Drill hole GL 26-76 at Golden Lake intersected 174.65 m of 0.35 g/t gold, including 21 m of 0.65 g/t gold and 3 m of 3.11 g/t gold. Drill holes some 1,100 m to the northwest of GL 26-76 – specifically drill holes GL 26-85 and GL 26-84 – have encountered gold mineralization. This is extremely encouraging as it shows that additional gold mineralization is now present on the far western side of the exploration drill plan. The current drill program covers an east-to-west drill pattern that extends approximately 1.6 km.

On May 26, 2026, the Company announced that it has advanced its geophysical targeting work which has identified new priority drill targets along the interpreted 826 Zone trend. Additionally, it announced that a third drill was being mobilized to test potential strike extensions of the 826 Zone.
