

FORM 7

MONTHLY PROGRESS REPORT

Name of CSE Issuer: **St-Georges Eco-Mining Corp.**

Trading Symbol: **SX**

Number of Outstanding Listed Securities: **124,010,526**

Date: **March 10, 2019**

1. Report on Business

St-Georges is developing new technologies to solve some of the most common environmental problems in the mining industry.

The Company controls directly or indirectly, through rights of first refusal, all of the active mineral tenures in Iceland. It also explores for nickel on the Julie Nickel Project & for industrial minerals on Quebec's North Shore and for lithium and rare metals in Northern Quebec and in the Abitibi region. Headquartered in Montreal, St-Georges' stock is listed on the CSE under the symbol SX and trades on the US OTC under the Symbol SXOOF and on the Frankfurt Stock Exchange under the symbol 85G1.

2. Other Corporate matters

Subsequent event: Appointment of a European Investors Relations Firm

On **March 2, 2019**, St-Georges announced that it appointed the London-based Public and Investor Relations firm Cassiopeia Services Ltd, as part of the Corporation's plan to raise its profile and grow its investor base. St-Georges will pay Cassiopeia a monthly retainer of £2,500 and 100,000 options to be issued and priced at the same price than management issuance.

Subsequent event: Iceland Gold Exploration

On **March 2, 2019**, the Company announced that subject to municipal licensing approval, it intends to drill up to 3,000 meters at the *Thormodsdalur Gold Mine* project. This will include the twin-drilling of certain historical drill holes and will add infill holes in the identified gold trend which strikes some 700 meters at surface. The objective will be to gather enough data to allow the establishment of a maiden NI 43-101 resource estimate by year end.

Furthermore, for the 2019 field season the company's Icelandic exploration team intends to map the *Tröllaskagi (Troll) Gold Project* on foot and by drone. Grab samples should be collected from visible mineralized rock. A first selection of samples will be done manually and assayed by technicians with a multi-element ICPMS, and fire assayed to ascertain key major, trace and precious metal contents.

Finally, at the *Vopnafjorður (Vopna) Gold Project* detailed geological maps will be produced this upcoming season. A major geological survey of the area will be conducted on foot, as well as a drone survey. Grab samples of mineralized rock will be conducted on a large-scale grid.

Metalurgical Research & Development

Lithium Extraction

The Company has been sourcing lithium feedstock for its R&D efforts. NDA's have been signed with owners of lithium projects and SX metallurgists will be able to test the portability of its process to a range of different mineral feedstocks.

In February, the Company has been informed that Hippo (ASX: HIP) has prepared 1 metric tonne of lithium bearing material for shipping to SX metallurgists in Montreal.

An initial draft report for the Phase 1 and parts of Phase 2 of its contractual agreement with Iconic Minerals has been shared confidentially with the principals of both companies. Over a dozen equipment manufacturers and solution providers have been approached to collaborate and signs NDAs and co-development with SX. The companies will selectively release results of different aspects of the reports to the public as it secures these new partners who otherwise would be potential competitors.

St-Georges reported that it has been able to concentrate Iconic's Bonnie Claire lithium bearing material in Phase 1 by a factor in excess of 8. The current development aim at stabilizing its process from the current 88% discarded material with a remaining 12% concentrate to a 96% discarded material for a final concentrate constituted of 4% of the original material while retaining 100% of the original lithium content. The majority of the tested recuperation rates out of solutions are of 100% with the lower results at 99.997%.

A break through to achieve over 99% at atmospheric pressure and low temperature was achieved reducing capex and simplifying the current assumptions that the industry has for hard rock leaching. St-Georges is expecting that in addition the process is greener than current processes with usable by products.

Kings of the North

The Board of KOTN has retained the service of an independent geologist specialized in external valuation to help the decision process regarding the future of the Company's majority controlled subsidiary.

ZeU Crypto Networks

CSE Exchange Listing

ZeU is advancing its listing process as planned. Cryptocurrencies being held against private placement from July 2018 and technology valuation have been an auditing challenge. The Company is now using December 31 as its audited financial date. Auditors are expected to finish their review in March and allow the Company to provide valuation and audits to the Exchange to complete its listing file and all additional requirements that arise during the process.

ZeU Acquisition of Vn3t Assets

On **February 4, 2019**, ZeU announced the execution of an asset purchase agreement with VN3T Technologies Inc. and its subsidiaries, collectively “VN3T”, an arm’s length party, pursuant to which ZeU acquired the key IP of a VN3T’s decentralized data market place platform and secured development services.

The IP and the expertise acquired will expedite the development of certain functionalities of ZeU’s blockchain marketplace platform for derivatives developed for Borealis EHF and will allow the integration of the new business segment of data trading in relation with this initiative and other opportunities. It will also generate exclusive tradeable content for Borealis.

For more information on the acquisition, please consult the press release <https://thecse.com/en/listings/mining/st-georges-eco-mining-corp>

Nomination of a Chief Technology Officer

Mr. Jean-Philippe Beaudet joined the board of ZeU Crypto Networks Inc. Mr. Beaudet will also take on the position of Chief Technology Officer and, alongside the company’s Chief Architect and CEO, will help identify blockchain development and deployment opportunities that can be quickly monetized.

Subsequent event: Filing of Provisional Patent for Blockchain-Based Secure Email System

On **March 3, 2019**, St-Georges announced that ZeU filed a provisional patent for a blockchain-based secure email system. The patent describes a complete blockchain email system that supports both internal and cross-chain emails with the potential to interact with non-blockchain email systems.

ZeU management is planning to release later this year an open-source version of its email distributed application. A free version allowing individual and corporations to use the platform will be distributed and the company will support groups of developers interested in cross integration and improvement of the platform.

ZeU is defining a pathway to fast deployment of its technology and has had discussions with complementary solutions providers in the same field. The company is in the process of securing ownership of 5,000,000 utility tokens of a blockchain-browser developer from a related third party at a pre-minting value of \$0.10 per token. The company entertains integration with similar solutions for faster deployment. A product oriented token (POT) minting for the blockchain email solution is being reviewed. The company expect to attract a community of developers to be compensated within the POT initiative within the next quarter subject to regulatory approvals.

Subsequent event: ZeU Retains the services of Cassiopeia Services Ltd

In March 2019, the company hired a communication and investors awareness firm specialized in blockchain out of London UK. Cassiopeia is thriving in the booming blockchain and crypto world. With multiple clients working on innovative projects powered by new technologies in different industries: from commodities to financial markets, payments, social media, digital identity and cybersecurity, Cassiopeia offers smart campaigns and highly specialised media, PR and IR consultancy.

Subsequent event: ZeU to Provide RNG & Blockchain Technologies to Gaming Operator

On **March 8, 2019** St-Georges announced that ZeU agreed to provide its patent pending Blockchain Random Number Generator and other related blockchain technologies to St. James House PLC (LSE: SJH), a UK licensed gaming operator, formerly known as BoxHill Technologies, by way of Joint-Venture for the establishment of a blockchain lottery.

The binding term sheet entered by the main parties is subject to a definitive contract. The agreement calls for the establishment of a new lottery joint venture with its main license in Malta.

The company is in active discussion with other gaming operators to license and deploy its Blockchain-Based Random Number Generator and Permission Based Blockchain Protocol.

For more information on the joint-venture, please consult the press release <https://thecse.com/en/listings/mining/st-georges-eco-mining-corp>

Borealis EHF

Executive level demonstrations of the distributed marketplace trading platform were held in February. The company expects to meet with Government officials to lobby for its proposed blockchain-based derivative trading business model in the coming weeks. Borealis expects to start to market to industry participants its blockchain marketplace software in late 2019 or early 2020. This should give the company time to obtain the required licenses to operate its own marketplace solutions.

3. Summary of activities:
