

FORM 7

MONTHLY PROGRESS REPORT

Name of CSE Issuer: **St-Georges Eco-Mining Corp.**

Trading Symbol: **SX**

Number of Outstanding Listed Securities: **145,338,936**

Date: **March 5, 2020**

1. Report on Business

St-Georges is developing new technologies to solve some of the most common environmental problems in the mining industry.

The Company controls directly or indirectly, through rights of first refusal, all the active mineral tenures in Iceland. It also explores for nickel-copper-cobalt and PGEs on the Julie Nickel Project and the Manicouagan Palladium-Rhodium Project & for industrial minerals on Quebec's North Shore. Headquartered in Montreal, St-Georges' stock is listed on the CSE under the symbol SX and trades on the US OTC under the Symbol SXOOF and on the Frankfurt Stock Exchange under the symbol 85G1.

2. Other Corporate matters**Lithium Processing Technology Pilot Plant**

On February 10, 2020 the company issued a corporate update pertaining to its various activities. The St-Georges' team has worked on the design, sourcing of equipment, and financial aspects of its proposed pilot plant for several months. In order to lower the risk of the proposal, the team initiated discussions with ready-built facilities with existing capacity. This could allow the building of the pilot plant's processing circuit faster with only minor modifications to the ready-built facilities. Early estimates confirm that capital expenditure should only be a fraction of the original budgeted cost as the Company will be leasing the facilities long-term. The Company expects to have secured an agreement for the pilot plant facilities in Q2 2020.

Manicouagan Palladium-Rhodium Project

In January the company announced that it entered in an agreement to acquire 100% of the Manicouagan Palladium-Rhodium project located 350 km north of the city of Baie-Comeau, QC. For details on the acquisition terms and a summary of past exploration work, please consult the press release available on the Canadian Securities Exchange website.

St-Georges' exploration team is planning a pre-drilling surface campaign to obtain permitting to intervene on-site in mid-summer. At the same time, St-Georges' management is having early-stage discussions with potential farm-in or earn-in partners to advance the project at a faster pace.

St-Georges Metallurgy Corp.

On February 27, St-Georges incorporated a new subsidiary, **St-Georges Metallurgy Corp.** with Enrico Di Cesare as its President & CEO. This entity will be a self contained subsidiary of St-Georges and will handle all metallurgical r&d, laboratories partnerships, metallurgical joint-ventures and related intellectual property.
