

FORM 7

MONTHLY PROGRESS REPORT

Name of CSE Issuer: **St-Georges Eco-Mining Corp.**

Trading Symbol: **SX**

Number of Outstanding Listed Securities: **124,010,526**

Date: **April 7, 2019**

1. Report on Business

St-Georges is developing new technologies to solve some of the most common environmental problems in the mining industry.

The Company controls directly or indirectly, through rights of first refusal, all of the active mineral tenures in Iceland. It also explores for nickel on the Julie Nickel Project & for industrial minerals on Quebec's North Shore and for lithium and rare metals in Northern Quebec and in the Abitibi region. Headquartered in Montreal, St-Georges' stock is listed on the CSE under the symbol SX and trades on the US OTC under the Symbol SXOOF and on the Frankfurt Stock Exchange under the symbol 85G1.

2. Other Corporate matters

Appointment of a European Investors Relations Firm

On **March 2, 2019**, St-Georges announced that it appointed the London-based Public and Investor Relations firm Cassiopeia Services Ltd, as part of the Corporation's plan to raise its profile and grow its investor base. St-Georges will pay Cassiopeia a monthly retainer of £2,500 and 100,000 options to be issued and priced at the same price than management issuance.

Iceland Gold Exploration

On **March 2, 2019**, the Company announced that subject to municipal licensing approval, it intends to drill up to 3,000 meters at the *Thormodsdalur Gold Mine* project. This will include the twin-drilling of certain historical drill holes and will add infill holes in the identified gold trend which strikes some 700 meters at surface. The objective will be to gather enough data to allow the establishment of a maiden NI 43-101 resource estimate by year end.

Furthermore, for the 2019 field season the company's Icelandic exploration team intends to map the *Tröllaskagi (Troll) Gold Project* on foot and by drone. Grab samples should be collected from visible mineralized rock. A first selection of samples will be done manually and assayed by technicians with a multi-element ICPMS, and fire assayed to ascertain key major, trace and precious metal contents.

Finally, at the *Vopnafjorður (Vopna) Gold Project* detailed geological maps will be produced this upcoming season. A major geological survey of the area will be conducted on foot, as well as a drone survey. Grab samples of mineralized rock will be conducted on a large-scale grid.

Metalurgical Research & Development

Lithium Extraction

On **March 31, 2019** confirmed that it has achieved complete and total recovery in leach of lithium from the bulk material provided by its partner Iconic Minerals (TSX-V: ICM) originating from their Bonnie Claire lithium project in Nevada. St-Georges' patent pending leaching technology achieved 100% leaching of lithium while not affecting the majority of the solids. 88% of the initial feed material is unleached which helps with chemicals consumption and tailings disposal. For additional information please consult the complete press release on <https://thecse.com/en/listings/mining/st-georges-eco-mining-corp>

Kings of the North

The Board of KOTN has retained the service of an independent geologist specialized in external valuation to help the decision process regarding the future of the Company's majority controlled subsidiary.

ZeU Crypto Networks

Filing of Provisional Patent for Blockchain-Based Secure Email System

On **March 3, 2019**, St-Georges announced that ZeU filed a provisional patent for a blockchain-based secure email system. The patent describes a complete blockchain email system that supports both internal and cross-chain emails with the potential to interact with non-blockchain email systems.

ZeU management is planning to release later this year an open-source version of its email distributed application. A free version allowing individual and corporations to use the platform will be distributed and the company will support groups of developers interested in cross integration and improvement of the platform.

ZeU management expects to have a beta version of the service deployed for testing purposes by end of Q2 2019. Shareholders and stakeholders interested in being part of the testing efforts will be able to submit their candidacy on St-Georges' or ZeU's new websites when the new sites are online in or around the 3rd week of April 2019.

ZeU Retains the services of Cassiopeia Services Ltd

In March 2019, the company hired a communication and investors awareness firm specialized in blockchain out of London UK. Cassiopeia is thriving in the booming blockchain and crypto world. With multiple clients working on innovative projects powered by new technologies in different industries: from commodities to financial markets, payments, social media, digital identity and cybersecurity, Cassiopeia offers smart campaigns and highly specialised media, PR and IR consultancy.

ZeU to Provide RNG & Blockchain Technologies to Gaming Operator

On **March 8, 2019** St-Georges announced that ZeU agreed to provide its patent pending Blockchain Random Number Generator and other related blockchain technologies to St. James House PLC (LSE: SJH), a UK licensed gaming operator, formerly known as BoxHill Technologies, by way of Joint-Venture for the establishment of a blockchain lottery.

The binding term sheet entered by the main parties is subject to a definitive contract. The agreement calls for the establishment of a new lottery joint venture with its main license in Malta.

The company is in active discussion with other gaming operators to license and deploy its Blockchain-Based Random Number Generator and Permission Based Blockchain Protocol.

For more information on the joint-venture, please consult the press release <https://thecse.com/en/listings/mining/st-georges-eco-mining-corp>

Towards the end of March, ZeU developed a lottery demonstrator that will be instrumental for the acquisition of the operating license by St-James House, the company's joint-venture partner and the lottery operator. This demonstrator is now being used as a marketing tool to expose the company's technology, particularly its Blockchain Random Number Generator, to other lottery and gambling operators.

ZeU Nominates Additional Board Member

On **March 19, 2019** ZeU engaged the services of Doctor Fenglian (Frances) Xu to serve on its board of directors and to advise the Company in the deployment of its blockchain technology and artificial intelligence initiatives to the healthcare industry.

ZeU to develop KinectHub

On **March 29, 2019** ZeU announced that it has been retained to develop the global blockchain infrastructure and data mining components of the KinectHub initiative of Kinect Corporation. KinectHub is a large multi-million-dollar infrastructure project using state-of-the-art technology such as blockchain, distributed storage, anonymity solution and privacy insurances to bring healthcare to third world countries.

ZeU's development team has initiated work on the first phase of the mandate that constitutes the contract with Kinect and expects to reach an important milestone within 45 days.

The platform to be developed and deployed will take the form of a SaaS in which each micro-service can be consumed separately or combined. The development will use an API strategy created for interoperability. This will in return create re-usability. The SaaS is essentially free in itself. Users pay for specific microservices, hosting and usages. This enables service acquisition or partnership to be added on the fly and boosts the offering.

Our client Kinect, will serve many countries including India, Tanzania, Cameroon & RDC. Reliable health records in a digital form is next to non-existent in Africa. This data will be useful for clinical trial, medication development and scientific studies. It represents access to millions of health records in an ethical and monetizable way.

Over a period of 2 years, gross estimations of the development budget is of \$8 million allowing for the development of the SaaS platform of current specific micro-service. \$5 million is allocated to the core infrastructure development, \$1,5 million is allocated to specific features needed along the way and \$1,5 million is allocated into security.

Potential conflict of Interest

The security services for access, transfer and hosting of data should be subcontracted in large part to vSekur, a Montreal developer co-founded by ZeU's CTO. Negotiations are expected to be conducted at arm-length by other officers of both companies. The two companies might enter into a joint-venture agreement for this part of the mandate representing approximately \$1,5 million while the remainder of the mandate is expected to be solely executed by ZeU.

3. Summary of activities:

- **New Contracts: St-Georges subsidiary, ZeU Crypto Networks inc. signed JV agreement with St-James House and signed a licensed and development agreement with Kinect Corporation (Refer to no. 2).**
- There were no contract terminations or financing cancellations in March 2019.
