

FORM 7

MONTHLY PROGRESS REPORT

Name of CSE Issuer: **St-Georges Eco-Mining Corp.**

Trading Symbol: **SX**

Number of Outstanding Listed Securities: 104,531,162

Date: **June 10, 2018**

1. Report on Business

St-Georges is developing new technologies to solve some of the most common environmental problems in the mining industry.

The Company controls directly or indirectly, through rights of first refusal, all of the active mineral tenures in Iceland. It also explores for nickel on the Julie Nickel Project & for industrial minerals on Quebec's North Shore and for lithium and rare metals in Northern Quebec and in the Abitibi region. Headquartered in Montreal, St-Georges' stock is listed on the CSE under the symbol SX, on the US OTC under the Symbol SXOOF and on the Frankfurt Stock Exchange under the symbol 85G1.

2. Other Corporate matters

Iceland Mineral Licenses (St-Georges Iceland Ltd)

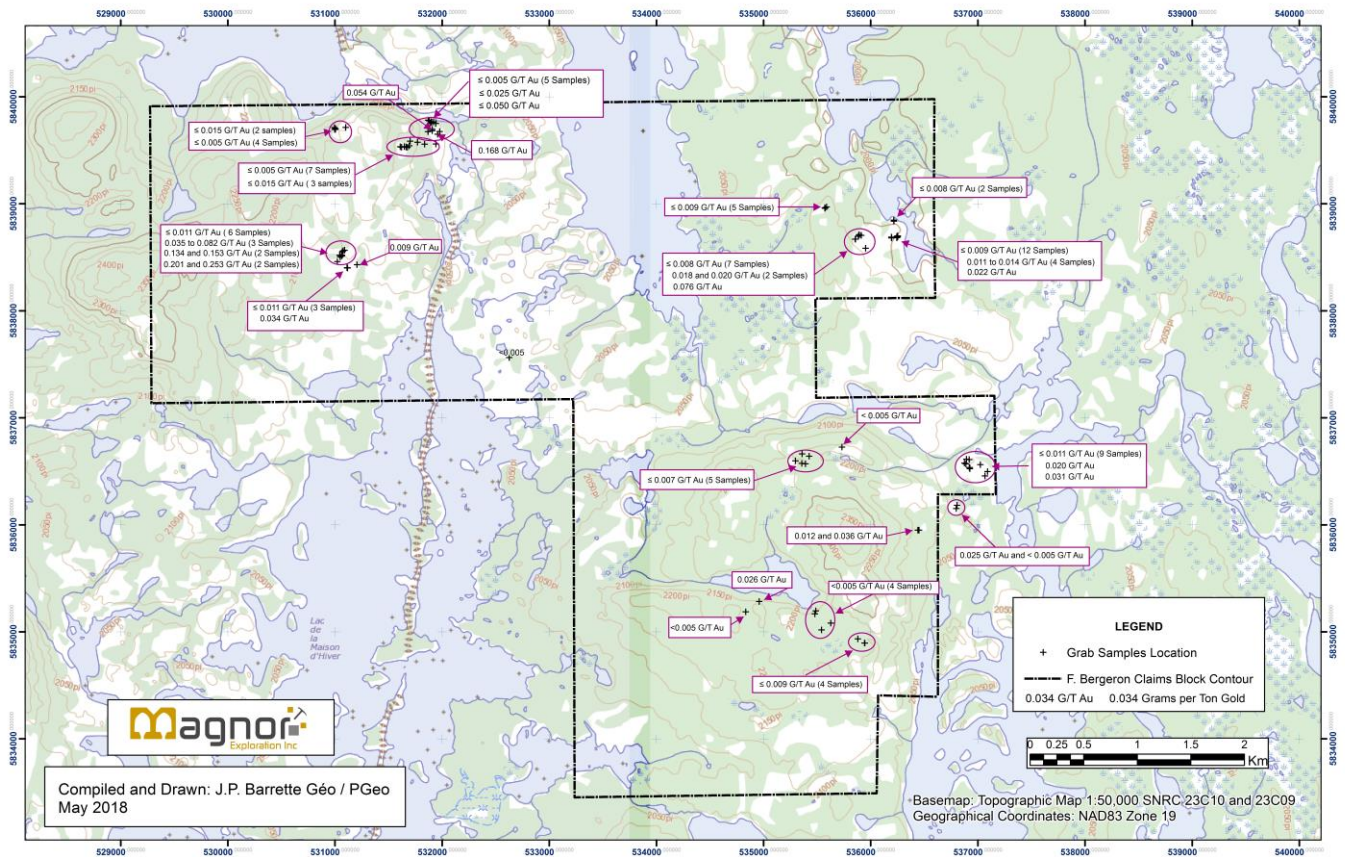

St-Georges' subsidiary, Iceland Resources EHF has conducted an extensive geophysics program over the Thor Gold Project with the help of an Icelandic licensed drone operator. The data collected will be used to plan the surface campaign scheduled for later this summer.

King of the North subsidiary

As reported in early May 2018, The company has received initial results of surface samples collected on the WinterHouse project in the Fall of 2017. Gold indicators were found across the whole land package. Additional surface work will be required this summer prior to a potential drilling campaign in the fall. Initial results indicate a similar geological context than the one found directly to the eastern boundaries on the "Courcy" gold project by the company Stelmine (TSX-V:STH)

King of the North estimates at \$1,600,000 the required budget for this year on the WinterHouse project.

Below is a map showing the zones covered by the exploration team.

Lithium Research Initiative

In early May the company's metallurgical team received additional test results from SGS Labs using some variation of the company's proprietary process. Lithium Clay from different sources were used. St-Georges' metallurgists expect to be able to provide an update on the commercial viability of the process in the beginning of the 3rd quarter of 2018.

St-Georges Mining Exploration Projects

In March, a Company that specializes in exploration campaigns coordination and in project management was hired to provide estimates and help with the permitting process for the Julie Nickel Project, the LeRoyal Lithium and the Muscovite Mines later this year.

Borealis Commodity Exchange **(Previously named St-Georges Market Place)**

As previously disclosed in a press release dated January 4, 2018 and in previous monthly reports, St-Georges is progressing in the software development of its decentralized market place platform for commodities. The company plans to initiate later this year the early tests of the platform and of the blockchain tracking software that will allow vertical integration with it;

A new corporation, currently 100% owned by St-Georges, was established in Iceland in May 2018 under the name of **Borealis Commodity Exchange EHF**. St-Georges expect to link this corporate structure with new corporate entities in Malta and a third sovereign jurisdiction to be disclosed. The ultimate corporate and ownership structure should be known in late July or early August 2018. The company expects to update its shareholders and stakeholders on potential business and equity partnership linked to this blockchain initiative controlled by St-Georges in the coming weeks

ZeU Crypto Networks Inc.

ZeU Crypto Networks is a wholly owned subsidiary of St-Georges. The subsidiary was created to host all core blockchain technology and smart contracts development and commercialization efforts.

On one of the initiatives, St-Georges' management is actively working to deploy this technology in partnership with ZeU in the domain of mineral commodity tracking and trading. Significant software development efforts were conducted in the first quarter of 2018 in order to advance this platform that should allow mining and mineral related businesses to enroll later this year. All other applications for the ZeU/Tiande technology will be developed and deployed exclusively within ZeU following the final closing of the assets acquisition from Tiande.

On Jan 14, 2018, St-Georges announced that its subsidiary, ZeU Crypto Networks Inc. entered into a non-binding letter of intent to acquire all of the Blockchain and Smart Contract Technologies assets of Qingdao Tiande Technologies Inc., a Chinese private company.

On February 26, 2018, St-Georges announced that, further to its January 15 and February 8, 2018 (amendment to the LOI) press releases, its wholly owned subsidiary ZeU Crypto Networks Inc. signed a definitive asset purchase agreement dated February 23, 2018 with Qingdao Tiande Technologies Limited and Beijing Tiande Technologies Limited with the intervention of Guiyang Tiande Technologies Limited to purchase substantially all the intellectual property of the Vendors.

In April 2018, St-Georges has moved forward with its financial advisor Gravititas Securities (See March 20th Press release) to identify financial partners and strategies for the coming year. Gravititas has launched an independent due diligence process, reviewing the technology of ZeU and visiting the laboratories of Tiande in Beijing. An initial draft due diligence report was received by St-Georges' management in May 2018.

The company expects to be allowed to publish excerpts of this report sometimes in June while a final addendum focusing on the Intellectual Property transferred should be made available in July 2018. St-Georges' management is currently pleased with the technology review performed by Gravitas' third-party specialists.
