

FORM 7

MONTHLY PROGRESS REPORT

Name of CSE Issuer: New Tech Lithium Corp. (the "Issuer").

Trading Symbol: NTM

Number of Outstanding Listed Securities: 13,630,408

Date: May 7, 2018

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by the CSE Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the CSE.ca website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the CSE Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

On April 17th, 2018, the Company announced that it has received positive geochemical results from a due diligence sampling program designed to confirm the presence of cobalt mineralization at the Buena Vista Hills Cobalt prospect in Nevada. Due diligence rock chip sample results from the top of the northeast margin of the historical iron-ore open pit

range from 0.048 per cent to 0.113 per cent cobalt and confirm previously reported rock chip sample cobalt data collected from around the existing open pit (Ted DeMatties, preprint unpublished data; average uncut grade equals 0.23 per cent Co) and historical drill data from a single vertical 580-foot total depth (TD) reverse circulation (RC) exploration drill hole completed by the owners in 2008 and located approximately 330 feet northeast of the northeast pit wall, which contains a 40-foot interval with an average grade of 0.12 per cent CoO (cobalt oxide). New Tech Lithium due diligence and comparative historical rock chip and drill hole sample results are reported herein.

All due diligence samples were collected from gossanous disseminated pyrite and stockwork pyrite veins hosted by strongly altered gabbro, co-magmatic basalt and variably pyrite-replaced magnetite bodies around the margins of, and dump samples from, an approximately 150-foot deep open pit that was dug in the past to exploit one or more massive magnetite iron orebodies. The zone of cobalt-pyrite mineralization exposed in the northeast wall of the existing open pit varies from 80 to 100 feet wide. The upper, main zone of mineralization intercepted in the historical drill hole is 90 feet thick, beginning at approximately 20 feet below surface, with lower-grade cobalt mineralization extending to the top of bedrock. Iron-cobalt mineralization and associated hydrothermal alteration are localized at the intersection of the northeast-trending SH fault zone and the northwest-trending cross-fault zone, producing a bloom of cobalt-pyrite mineralization of currently unknown dimensions. The oxidized sulphide (pyrite) zone in the open pit extends from the surface to the approximate bottom of the pit, at least 150 feet deep. Due to the described dimensions of the zone of cobalt mineralization exposed in the existing open pit and the cobalt mineralization intersected in the historical drill hole located northeast of the pit, the company considers the Buena Vista Hills cobalt project to be a viable open pit mining exploration target.

Cobalt mineralization occurs as disseminations and stockwork veins of cobalt-bearing pyrite associated with strong sodium-calcium (Na-Ca) hydrothermal alteration in gabbroic intrusive rocks, co-magmatic basalt-andesite volcanic flow rocks and replacements of massive magnetite bodies. The igneous host rocks are all part of the Jurassic-aged Humboldt IOCG (iron oxide copper gold) magmatic complex. Very low levels of nickel-sulphide mineralization represent the only other base metal associated with the cobalt mineralization, and the prospect can be characterized as an iron-cobalt deposit. Cobalt-pyrite sulphide mineralization is associated with albite-actinolite and late chlorite-sericite alteration that variably overprints earlier scapolite-hornblende alteration in gabbro intrusive rocks and basalt-andesite volcanic flow rocks, and early massive to disseminated oxide magnetite replacement bodies are genetically and spatially related to high-temperature, intrusive-proximal scapolite-hornblende alteration.

New Tech Lithium had previously signed a letter of intent (LOI) with an arm's-length vendor to lease the mineral rights beneath a privately owned, approximately 640-acre (one square mile) section in Pershing county, Nevada (see the news release dated March 12, 2018). Positive technical due diligence sampling results provide impetus for the company to conclude the due diligence process and proceed with completion of a definitive agreement in the near term.

2. Provide a general overview and discussion of the activities of management.

None.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production

programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

On April 17th, 2018, the Company announced that it has received positive geochemical results from a due diligence sampling program designed to confirm the presence of cobalt mineralization at the Buena Vista Hills cobalt prospect in Nevada.

The company had previously signed a letter of intent (LOI) with an arm's-length vendor to lease the mineral rights beneath a privately owned, approximately 640-acre (one square mile) section in Pershing county, Nevada (see the news release dated March 12, 2018). Positive technical due diligence sampling results provide impetus for the company to conclude the due diligence process and proceed with completion of a definitive agreement in the near term.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

None.

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

None.

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

None.

8. Describe the acquisition of new customers or loss of customers.

Not applicable.

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

None.

10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.

None.

11. Report on any labour disputes and resolutions of those disputes if applicable.

Not applicable.

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

None.

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

None.

14. Provide details of any securities issued and options or warrants granted.

Security	Number Issued	Details of Issuance	Use of Proceeds ⁽¹⁾
N/A			

15. Provide details of any loans to or by Related Persons.

None.

16. Provide details of any changes in directors, officers or committee members.

None.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

None.

Issuer Details Name of Issuer New Tech Lithium Corp.		For Month End April, 2018	Date of Report YY/MM/DD 18/05/07
Issuer Address 800 – 1199 West Hastings Street			
City/Province/Postal Code Vancouver, BC	Issuer Fax No. 888.241.5996	Issuer Telephone No. (604)283.1772

Certificate of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there were/is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to CSE that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all CSE Requirements (as defined in CSE Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated: May 7, 2018
