

FORM 7

MONTHLY PROGRESS REPORT

Name of CSE Issuer: New Tech Lithium Corp. (the "Issuer").

Trading Symbol: NTM

Number of Outstanding Listed Securities: 46,494,896

Date: September 10, 2018

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by the CSE Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the CSE.ca website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the CSE Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

On August 1st, 2018, the Company announced that it has optioned a large property package approximately 4.2 kilometres southeast of Sokoman Iron Corp.'s flagship Moosehead high-grade gold project in Newfoundland.

New Tech Lithium's new property is approximately 4.0 kilometres long by 1.5 km wide and located roughly on trend with the gold-mineralized mesothermal orogenic quartz vein system that is the current focus of Sokoman's exploration diamond drilling program. For the details of the highlights, see the section 3 dated August 1st, 2018.

On August 8th, 2018, the Company announced that it has initiated a phase 1 exploration program at its Buena Vista Hills cobalt project, located 25 miles southeast of Lovelock, Nev. For the details of the highlights, see the section 3 dated August 8th, 2018.

2. Provide a general overview and discussion of the activities of management.

None.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

On August 1st, 2018, the Company announced that it has optioned a large property package approximately 4.2 kilometres southeast of Sokoman Iron Corp.'s flagship Moosehead high-grade gold project in Newfoundland. New Tech Lithium's new property is approximately 4.0 kilometres long by 1.5 km wide and located roughly on trend with the gold-mineralized mesothermal orogenic quartz vein system that is the current focus of Sokoman's exploration diamond drilling program.

Sokoman reports in its July 30, 2018, news release that its first drill hole of its 2018 program (MH-18-01) produced an 11.9-metre intersection (109.0 m to 120.9 m depth) that contains 44.96 grams per tonne (g/t) gold, including a 1.35 m intercept with up to 50 sites of visible gold which assayed 385.85 g/t gold. Diamond drill hole MH-18-01 appears to define a new zone of gold mineralization at the Moosehead property, which would be in addition to two previously discovered gold zones, the western and eastern gold trends. Diamond drill hole MH-18-01 is located approximately 60 m east of the eastern gold trend. The other 2018 phase 1 diamond drilling was focused on shallow mineralization in the western trend. There, MH-18-02 intercepted 1.2 metres of 12.59 g/t gold (50.45 m to 51.65 m) and MH-18-03 intercepted 6.42 metres of 8.18 g/t gold (18.65 m to 25.07 m), which includes 1.17 m of 35.31 g/t gold (23.9 m to 25.07 m).

Logistics for the Moosehead gold project are excellent. The Trans-Canada Highway crosses the north end of Sokoman's Moosehead property and Route 360 is 1.2 kilometres northwest of most of the previous drilling on the property. The town of Grand Falls-Windsor is 20 kilometres west of the property and the deepwater port of Botwood is 17 kilometres north of the property.

Agreement terms

New Tech has the option to acquire 100 per cent of the property in a cash and share exchange agreement in consideration for:

- Payment of \$15,000 upon closing of the agreement;
- Issuance of 2.5 million common shares to be paid upon closing of the agreement.

On August 8th, 2018, the Company announced that it has initiated a phase 1 exploration program at its Buena Vista Hills cobalt project, located 25 miles southeast of Lovelock, Nev.

The program, with an estimated budget of \$250,000 (U.S.), will consist of a review and reinterpretation of a historic airborne magnetic survey, a detailed geologic/geochemical survey, and a drill program consisting of approximately 2,400 feet of diamond drilling and 3,300 feet of reverse circulation drilling. The Buena Vista Hills cobalt project encompasses the past-producing open-pit Segerstrom-Heizer iron ore mine, which produced more than 1.2 million tons of iron ore from 1943 to 1966. An historic open-pit reserve estimate, as reported by The Nevada Bureau of Mines, Bulletin 89 (1977), was estimated at 35 million tons with an average grade of 30 per cent iron. The reserve estimate reported by the Nevada Bureau of Mines (NBM) in 1977 was derived by the NBM from geophysics (magnetics) survey and historic drilling data, and iron-ore production at the Segerstrom-Heizer mine before National Instrument 43-101 disclosure of historical estimates guidelines existed, and additional drilling and sampling must be completed to verify and update the historic estimate. A qualified person (QP) has not done sufficient work or have sufficient information to classify the historic estimate as a current mineral resource or mineral reserve. Therefore, New Tech is not treating the historic estimate as a current mineral resource or reserve.

Cobalt mineralization at Buena Vista Hills occurs within disseminations and stockwork veins of pyrite and is characterized as an iron-cobalt deposit. Recent rock chip sampling conducted by the company along the northeast margins of the open pit resulted in cobalt values ranging from 0.04 per cent Co to 0.113 per cent Co and supported historic reported cut

sample results (lowest, 0.009 per cent Co, and highest, 1.2 per cent Co, samples are cut from the DeMatties data base) which averaged 0.18 per cent Co (T. DeMatties, unpublished preprint data).

A 580-foot-vertical reverse circulation drill hole was completed approximately 330 feet northeast of the Segerstrom-Heizer open-pit mine by Zephyr Mining Ltd. in 2008 and returned a 40-foot interval with an average grade of 0.12 per cent CoO occurring within a 60-foot interval of 0.10 per cent CoO and a 90-foot interval of 0.09 per cent CoO.

New Tech Lithium is engaged in the exploration and development of promising cobalt and lithium projects in America, including the Buena Vista Hills cobalt project in Nevada, the Fredericktown cobalt project in Missouri and the Paradox basin lithium-bromine project in Utah/Colorado. The company is managed by seasoned professionals with extensive experience in mineral exploration and development throughout the world.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

None.

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

None.

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

None.

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how

the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

None.

8. Describe the acquisition of new customers or loss of customers.

Not applicable.

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

None.

10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.

None.

11. Report on any labour disputes and resolutions of those disputes if applicable.

Not applicable.

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

None.

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

None.

14. Provide details of any securities issued and options or warrants granted.

Security	Number Issued	Details of Issuance	Use of Proceeds ⁽¹⁾

15. Provide details of any loans to or by Related Persons.

None.

16. Provide details of any changes in directors, officers or committee members.

None.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

None.

Issuer Details Name of Issuer New Tech Lithium Corp.		For Month End August, 2018	Date of Report YY/MM/DD 18/09/10
Issuer Address 800 – 1199 West Hastings Street			
City/Province/Postal Code Vancouver, BC		Issuer Fax No. 888.241.5996	Issuer Telephone No. (604)283.1772
Contact Name Rudy de Jonge		Contact Position CEO	Contact Telephone No. (604)782.4191
